HSE No. 11147-GB

Surface biocide for amateur use against algae. For use on outdoor hard surfaces such as patios, pathways, driveways, masonry plus decking and fencing and many others.
No scrubbing or pressure washing required. Kills algae within 5 minutes, visibly removes algae after 10-14 days.

INSTRUCTIONS FOR USE: Dilution rate: 25% - 1 part product with 3 parts of water. **For the diluted product:** 50 ml/m². **For the active:** 0.25 g/m². Apply product evenly across a dry surface using a low-pressure garden sprayer. **For algae:** Example dilution rates for when using garden pressure sprayer.

Coverage	Concentrate (1 part)	Water (3 parts)
1 m²	12.5 mL	37.5 mL
10 m²	125 mL	375 mL
20 m²	250 mL	750 mL

1. Fill garden sprayer with half of the water required. **2.** Add the required amount of concentrate. **3.** Add the remainder of the water and mix thoroughly. **4.** Spray area evenly, avoiding run-off. **5.** Wash equipment thoroughly with water immediately after use and drain the sprayer on areas of bare soil not intended to bear vegetation, away from drains and water courses. Don't apply if rain is expected in the following 24 hours. Do not spray or pour on plants. In the event of direct contact with plants, flush with clean water. Keep children and pets away from treated areas until the area is completely dry (often 5-6 hours). Avoid treating paved surfaces and equipment adjacent to waterways. This product is poisonous to fish and other aquatic organisms.

Active Ingredient: Didecyldimethylammonium chloride (DDAC) 2% w/w. A water based concentrate for amateur use.
Application method: Low pressure spray.
