INSTRUCTIONS FOR USE

FOR USE ONLY AS A HOME GARDEN SLUG AND SNAIL KILLER

For use on bare soil and around edible and non-edible plants, both protected and outdoors.

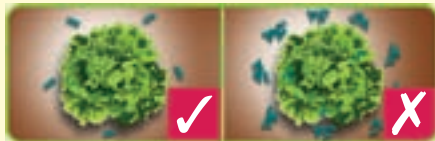

WHEN TO USE: When using outdoors pellets should be used in mild damp conditions when slugs and snails are active. If using on plants under glass etc. the soil should be moist but not wet at the time of use. When weather conditions (warm and wet) favour slugs and snails further treatments with the pellets will be necessary.

WHERE TO USE: Use on bare soil to protect both edible crops, and ornamental plants including those grown under glass.

HOW TO USE: Sprinkle the pellets evenly on the soil surface about 120 pellets per square metre (1.5g product/m²) around plants to be protected.

Avoid using excessive irrigation or watering for a few days after application.

When applying Slug Clear Advanced Pellets near food crops, care should be taken to avoid pellets becoming trapped or resting in the leaves.
