When will I see the results?

Results are quick, after **7 days your lawn will become a richer, greener colour.** You will see the moss blacken as it dies (any blackening of the grass is only temporary).

After 2 weeks simply rake out the dead moss, the grass will then re-establish. **Maximum weed control will take 3-5 weeks.** A second application may be necessary after 6 weeks on badly infested lawns where stubborn weeds or moss persist.

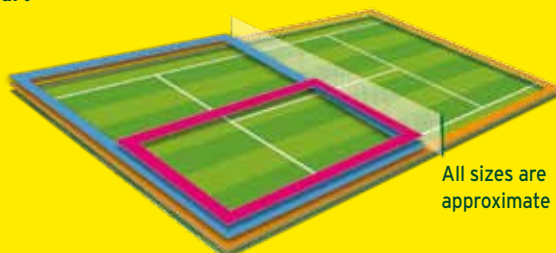

Instructions for use

How much will I need?

This pack treats 80 square metres eg 8 metres by 10 metres.

To determine the size of your lawn multiply the length by the width in metres. This will give you the area of your lawn in square metres. As a guide one large stride is approximately 1 metre.

- Up to 100m² = Quarter of a tennis court
- Up to 200m² = Half of a tennis court
- Up to 400m² = A whole tennis court

All sizes are approximate

EVERGREEN®

complete

For a rich, green lawn that controls most broad-leaved lawn weeds and moss, with unique Water Smart formula

*Makes the most of every drop!

EverGreen® Complete helps build a thick, green lawn with stronger roots which better absorb water and nutrients. This helps protect your lawn against heat, drought and other stresses.

Fed with EverGreen® Complete

Builds a thick lawn to trap and prevent water loss

Builds strong roots to optimise water absorption

Unfed Lawn

When and where do I use it?

Apply to lawns any time between April and September when weeds are actively growing. Apply when the weather is fair, the soil moist and the grass dry and frost free.

EverGreen® Complete

- ✓ Can be used around trees in the lawn, but avoid contact with the foliage.
- ✓ Can be applied where bulbs are growing in the lawn, provided it is applied after all the bulb foliage has died down naturally.
- ✗ Should not be applied to lawns less than 6 months old.
- ✗ Avoid drift onto flower beds and other neighbouring plants.

How do I use it?

35g BY HAND
covers 1m x 1m
Apply at a maximum individual dose of 35g per square metre (1oz per sq yard).

For a visual guide to the correct rate, first spread the recommended amount over a small measured area.

BY SPREADER

Use the EverGreen® Easy Spreader for simple and accurate application.

If using a Scotts EvenGreen® Drop Spreader set the calibration dial to 6. If using a Scotts EasyGreen® Rotary Spreader set the calibration dial to 27. Owners of other spreaders, please contact the Scotts Garden Advisor on 00 44 (0) 870 5301010.

BY REFILLING THE EverGreen® complete DISPENSER PACK

Refer to the dispenser pack for full instructions.

What about my children and pets?

In the absence of rain, EverGreen® Complete must be watered in. Keep children and pets away from treated areas until dry.

Any other advice?

MOWING - Avoid mowing the lawn 2-3 days before and after treatment. Do not use the first 4 mowings after treatment for mulching. They will be safe to use after being thoroughly composted for 6 months.

WATERING-IN - If no rain falls within 2 days, water the lawn thoroughly so that the lawn food starts to work.

STAINING - Do not walk on the lawn until the product has been watered in, since moss killer can cause stubborn brown stains on clothes, paving slabs etc. Brush off immediately if accidentally spilt.

EVERGREEN®

Why do I need to feed my lawn?

Lawns need nutrients to stay healthy and green. The three most important nutrients are:

- N** Keeps your lawn green and thick
14% nitrogen
- P** Makes roots strong
2% phosphorus pentoxide
- K** Makes leaves strong and healthy
4% potassium oxide

Why is EverGreen® Complete best?

EverGreen® Complete is a perfect all-in-one lawn treatment to feed, weed and control moss.

Our unique nitrogen formula has been specifically designed to deliver the best greening power.

We guarantee that your lawn will be greener and healthier in just 7 days!
