### SAFETY INSTRUCTIONS

To avoid risks to man and the environment, comply with the instructions for use.

**Protection during/in use.**

KEEP OFF SKIN.

Avoid contact with eyes.

In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.

WASH HANDS AND EXPOSED SKIN AFTER USE.

IF SWALLOWED, SEEK MEDICAL ADVICE IMMEDIATELY AND SHOW THIS CONTAINER OR LABEL.

**Environmental protection.**

Do not empty into drains.

Do not contaminate water with the product or its container.

**Storage and disposal.**

KEEP PRODUCT AWAY FROM CHILDREN AND PETS.

KEEP IN ORIGINAL CONTAINER, tightly closed, in a safe place.

Keep product away from food, drink and animal feeding stuffs.

Dispose of empty container in the dustbin. Dispose of unused product in its container at a household waste site (civic amenity site). Contact you local council (local authority) for details.

#### NPK FERTILISER 19.5-1.5-1.8 with IRON

Nitrogen (N) total	19.5%
Ureic nitrogen (N)	18.5%
Phosphorus Pentoxide (P <sub>2</sub> O <sub>5</sub> ) soluble in neutral ammonium citrate	1.5% (0.6%P)
Potassium Oxide (K <sub>2</sub> O) soluble in water	1.8% (1.5%K)
Iron (Fe) soluble in water	11.0%

Protect from Frost

#### Lawn success made easy!

For a great looking lawn all year round we recommend:

#### Step 1

- ✓ Feeds lawns
- ✓ Kills weeds
- ✓ Kills moss

#### Step 2

- ✓ Strengthens roots
- ✓ Kills moss
- ✓ Winter lawn protection

EverGreen Autumn contains ferrous sulphate. Always read the label. Use pesticides safely.

# EVERGREEN®

## complete soluble

MAPP 11055

EverGreen® Complete Soluble is a unique water-on product designed to green your lawn and kill weeds and moss in just one application. It will kill most common broad-leaved weeds in established lawns including buttercup, white clover, daisy, dandelion and plantain.

#### Why do I need to feed my lawn?

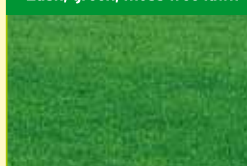

Lawns need nutrients to stay healthy and green. The three most important nutrients are:

- N** Keeps your lawn green and thick  
19.5% nitrogen
- P** Makes roots strong and healthy  
1.5% phosphorus pentoxide
- K** Makes leaves strong and healthy  
1.8% potassium oxide

#### Mossy, weedy, patchy lawn

#### Lush, green, moss free lawn

EverGreen Complete Soluble is the quick way to a lush, green, weed and moss free lawn because it feeds the grass right down to the roots, making it stronger and thicker.

The proportions of these nutrients are represented by the NPK score 19.5-1.5-1.8 + 11% Iron.

### When will I see results?

After a day the lawn will become a richer greener colour. Within hours the moss will blacken as it dies (any blackening of the grass is only temporary). After 2 weeks dead moss can be raked out.

Some weeds will grow vigorously at first and become twisted and distorted. Maximum weed control will take 3-6 weeks.

A second application of EverGreen® Complete Soluble may be necessary after 4-6 weeks on badly infested lawns where stubborn weeds/moss persist.

### Instructions for use

FOR USE ONLY AS A HOME GARDEN LAWN TREATMENT.

#### How much will I need?

This pack treats 40 sq.m i.e: 10 metres by 4 metres.

- Up to 100 sq.m = Quarter of a tennis court
- Up to 200 sq.m = Half of a tennis court
- Up to 400 sq.m = A whole tennis court

All sizes are approximate

To determine the size of your lawn measure the length and width of your lawn in metres and multiply the distances. As a guide one large stride is approximately 1 metre. This will give you the area of your lawn in square metres.

Maximum individual dose: 200g product per 10 sq.m.

### How do I use it?

This carton contains two different types of sachets. Sachet A - Black. Sachet B - White.

Open one of each sachet,

A and B (do not use sachets separately), pour contents (100g sachet A + 100g sachet B = 200g product) into 9 litres (2 gallons) of water in a watering can fitted with a coarse rose or sprinkle bar. Stir thoroughly and apply evenly over 10 sq.m of lawn. Wash out equipment thoroughly after use.

To avoid staining keep product off clothing, paved areas and other hard surfaces. USE BOTH SACHETS FOR THE 9 LITRES OF WATER.

This carton of EverGreen Complete Soluble contains 8 sachets: 4 x Sachet A, containing a water soluble granular formulation (WG) of 1.07% w/w dichlorprop-P, 1.07% w/w MCPA and 0.135% w/w dicamba and 4 x Sachet B, containing ferrous sulphate as a water soluble powder (SP). This equates to an overall content of 0.54% w/w dichlorprop-P, 0.54% w/w MCPA, 0.068% w/w dicamba and 31.3% ferrous sulphate.

The first 4 mowings after treatment should be thoroughly composted for at least 6 months before being used in the garden.

### When and where do I use it?

For use on lawns.

Apply to established lawns (at least 6 months after seeding or turfing) between April and September when the weather is fair, the soil moist and when the grass and moss are actively growing.

For best results apply in calm warm weather. Avoid mowing the lawn 3 days before and after treatment.

- ✗ Do not apply during freezing conditions or when rain is likely within 6-8 hours.
- ✗ Do not apply to lawns suffering from drought.
- ✗ Do not apply on windy days to avoid drift onto flowerbeds and neighbouring plants.
- ✗ Do not re-seed or turf within 8 weeks of last treatment.

### What about my children & pets?

CHILDREN AND PETS can play on treated lawn once dry. Keep grazing animals, e.g. rabbits off treated areas for at least 2 weeks until poisonous weeds such as ragwort have died.

Online product labels are current at the time of uploading.  
Always read the label on your purchased product before use.
