## cut & feed™ lawn food

Ideal for use straight  
after mowing!

### Why do I need to feed my lawn?

Lawns need nutrients to stay healthy and green.  
The three most important nutrients are:

- N** Keeps your lawn green and thick  
3% nitrogen
- P** Makes roots strong  
3% phosphorus pentoxide
- K** Makes leaves strong and healthy  
3% potassium oxide

EverGreen® Cut & Feed contains a unique and effective blend of nutrients specially developed by our lawncare scientists. The proportions of these nutrients are represented by the NPK score 3-3-3 + 2% Iron.

### When will I see the results?

Results are quick, after 3 days your lawn will become a richer, greener colour.

### Instructions for use

#### How much will I need?

This pack treats 100 square metres  
e.g. 10 metres by 10 metres.

To determine the size of your lawn multiply the length by the width in metres.

This will give you the area of your lawn in square metres. As a guide one large stride is approximately 1 metre.

■ Up to 100m<sup>2</sup> =  
Quarter of a tennis court

■ Up to 200m<sup>2</sup> =  
Half of a tennis court

■ Up to 400m<sup>2</sup> =  
A whole tennis court

All sizes are approximate

### When do I use it?

Apply to lawns any time between March to September. Apply when the weather is fair, the soil moist and the grass dry and frost free.

### How do I use it?

#### BY HAND

Apply evenly at 30g per square metre (1oz per sq yd). For a visual guide to the correct rate, first spread the recommended amount over a small measured area.

#### BY WHEELED SPREADER

Use the EverGreen® Easy Spreader for simple and accurate application.

If using a Scotts EvenGreen® Drop Spreader set the calibration dial to 5. If using a Scotts EasyGreen® Rotary Spreader set the calibration dial to 26. Owners of other spreaders, please contact the Scotts Garden Advisor on 00 44 (0) 870 5301010.

BY REFILLING THE EverGreen® Cut & Feed DISPENSER PACK

Refer to the dispenser pack for full instructions.

### What about my children and pets?

Children and pets need not be kept off the lawn. However, see information on staining in 'Any other advice?' box.

### Any other advice?

**MOWING** - EverGreen Cut & Feed can be applied directly after mowing your lawn. You should avoid mowing for a week after treatment, or until after rainfall or irrigation.

**WATERING-IN** - This is not necessary unless the weather is hot and dry and the lawn is under stress.

**STAINING** - Do not walk on the lawn until the product has been watered in, since ferrous sulphate can cause brown stains on clothes, paving slabs etc. Brush off immediately if accidentally spilt.

# EVERGREEN®

## cut & feed™ lawn food

### Lawn success made easy!

For a great looking lawn all year round we recommend:

- ✓ Greens in 3 days
- ✓ No need to water in
- ✓ Strengthens roots
- ✓ Kills moss
- ✓ Winter lawn protection

Always read the label. Use pesticides safely.  
EverGreen® Autumn contains Ferrous Sulphate.
