

## EverGreen "feed & weed liquid for your lawn"

MAPP 13072

PCS No. 90599

will kill a wide range of broad-leaved weeds whilst feeding your lawn to give a rich green colour.

### Instructions for use

#### "When and where do I use it?"

Any time between April and September when the grass is actively growing. Apply when the weather is fair, the soil moist, the grass dry and frost free and the weeds are actively growing. Avoid mowing the lawn 2-3 days before and after treatment.

Do not apply during freezing conditions or when rain is imminent. Do not apply to lawns suffering from drought or under 6 months old. Do not apply on windy days to avoid drift.

#### "How do I use it?"

Apply using a watering can fitted with a fine rose or sprinkle bar. Shake well before use. Using the measure provided, mix 80ml of concentrate in 4.5 litres (1 gallon) of water. Stir and apply evenly over 8m<sup>2</sup> of lawn. Ensure complete and even coverage but avoid over dosing. Repeat treatment after 6 weeks (minimum) if stubborn weeds persist. Avoid drift onto flowerbeds and neighbouring plants. Avoid walking on treated areas before they are dry. Wash out equipment thoroughly after use. The first 4 mowings after treatment should be composted for 6 months before being used in the garden. When renovating treated areas an interval of 6-8 weeks should elapse before re-seeding. Maximum individual dose: 10 ml of product per square metre.

### SAFETY INSTRUCTIONS

#### Storage & Disposal

KEEP PRODUCT AWAY FROM CHILDREN AND PETS

KEEP PRODUCT IN ORIGINAL CONTAINER, tightly closed in a safe place

For UK only: Dispose of empty container in the dustbin. Dispose of unused product in its container at a household waste site (civic amenity site). Contact your local council (local authority) for details.
