# EVERGREEN®

## lawn repair kit

EverGreen® Lawn Repair Kit is a 2-in-1 kit containing Multi Purpose Grass Seed and Lawn Food, ideal for improving thin, patchy areas and treating bare spots. Lawn repairs made easy!

### THE EVERGREEN® DIFFERENCE

• EverGreen® has a unique mix of premium sports grade seed as used by professionals. It germinates 50% faster† and gives a tough and durable lawn.

• Watersmart grass technology grows strong roots for optimum absorption of water and nutrients.

### When will I see the results?

In good conditions when the soil is moist, grass will start to appear from 5 days. In less favourable conditions allow 10-14 days. Any existing grass will start to darken in 7 days.

### When do I use it?

Apply March to early October.

### How much will I need?

This pack will create a new lawn of 20m<sup>2</sup> (4m x 5m). To determine the size of your lawn multiply the length by the width in metres. This will give you the size of the area you wish to sow. As a guide one large stride is approximately 1 metre.

#### UK DECLARATION EC FERTILISER NPK FERTILISER CONTAINING MAGNESIUM 8-12-8 (3.3)

Nitrogen (N) total	8.0%	
Ammoniacal nitrogen (N)	8.0%	
Phosphorus pentoxide (P <sub>2</sub> O <sub>5</sub> ) soluble in neutral ammonium citrate and in water	10.0%	(4.4%P)
Phosphorus pentoxide (P <sub>2</sub> O <sub>5</sub> ) soluble in water	9.0%	(3.9%P)
Potassium oxide (K <sub>2</sub> O) soluble in water	8.0%	(6.7%K)
Magnesium oxide (MgO)	3.3%	(2.0%Mg)

#### EIRE DECLARATION EC FERTILISER NPK FERTILISER CONTAINING MAGNESIUM 8-5.2-6.7 (2.0)

Nitrogen (N) total	8.0%
Ammoniacal nitrogen (N)	8.0%
Phosphorus (P) soluble in neutral ammonium citrate and in water	4.4%
Phosphorus (P) soluble in water	3.9%
Potassium (K) soluble in water	6.7%
Magnesium (Mg)	2.0%

### Simple steps to repairing a great lawn

#### Step 1 Preparation

- 1 Mow the lawn short, raking out dead grass, moss and debris.
- 2 In dry conditions, moisten the lawn.

#### Step 2 Sowing Food

- 1 Scatter a large handful of EverGreen® Lawn Food per square metre (30g or 1oz/sq.yd).
- 2 Rake well into the soil.

#### Step 3 Sowing Seed

- 1 Shake the box to remix the seed.
- 2 You'll need a small handful per square metre (20g) to over seed thin areas, or a large handful (30g or 1oz/sq.yd) for bare patches. For a visual guide, apply to a measured area first.
- 3 Create a criss-cross pattern by sowing half the seed from left to right and the rest from top to bottom.
- 4 Gently rake in, then tread or roll seed into the soil.

#### Step 4 After sowing

- 1 Unless it rains, soak with a fine spray and keep soil moist for the next few weeks.
- 2 The grass can be trimmed when 5-8cm (2-3in).
- 3 Each time you mow, lower blade height a level until it's at 2.5cm (1in).
- 4 Do not cut more than 1/3 off the growth at any one time.

† Trials have proved that EverGreen® Grass Seed germinates 50% faster than some other commercial grass seeds.
