

# EVERGREEN®

## Enriched **Lawn Soil**

Applying this 100% organic EverGreen Lawn Soil (commonly known as Lawn Dressing) will improve the root zone of lawn grasses, as it reduces compaction and improves aeration. It encourages increased grass root activity.

Increasing grass root activity will improve the ability of the lawn to withstand hard wear and drought conditions. The organic matter will also help to maintain an acid balance in the soil which will encourage healthy turf growth and grass to thrive.

### How to use

In autumn spike the whole lawn area down to a depth of at least 8cm (3 inches) with a garden fork. Spread the EverGreen Lawn Soil (commonly known as Lawn Dressing) over the lawn with the back of a rake, working it well into the surface and into the holes that have been made. The Lawn Soil should be spread evenly so that depressions are filled and no new humps are created.

### Storage

Store in a dry, frost-free place, away from weedkillers and other garden chemicals. Reseal bag after use.
