Unused product in its container may be disposed of in the dustbin.

NPK FERTILISER 19.5-1.5-1.8 with IRON

Nitrogen (N) total	19.5%
Ureic nitrogen (N)	18.5%
Phosphorus Pentoxide (P ₂ O ₅) soluble in neutral ammonium citrate	1.5% (0.6%P)
Potassium Oxide (K ₂ O) soluble in water	1.8% (1.5%K)
Iron (Fe) soluble in water	11.0%

HARMFUL IF SWALLOWED
IRRITATING TO EYES

EVERGREEN®

mosskil soluble

fast greening + mosskiller

EverGreen® Mosskil Soluble is a unique water-on product designed to green your lawn and kill moss in just one application.

"When will I see results?"

After a day the lawn will become a richer greener colour. Within hours the moss will blacken as it dies (any blackening of the grass is only temporary). After 2 weeks dead moss can be raked out.

A second application of EverGreen Mosskil Soluble may be necessary after 4-6 weeks on badly infested lawns where stubborn moss persists.

Instructions for use

"How much will I need?"

This pack treats 40 square metres i.e. 10 metres by 4 metres.

Small Lawn: **Up to 100m²**

Medium Lawn: **Up to 200m²**

Large Lawn: **Over 300m²**

To determine the size of your lawn measure the length and width of your lawn in metres and multiply the distances. As a guide one large stride is approximately 1 metre. This will give you the area of your lawn in square metres.

Maximum individual dose: 100g product per 5 sq.m.

"When and where do I use it?"

For use on lawns

FOR USE ONLY AS A HOME GARDEN LAWN TREATMENT

Apply to established lawns (at least 6 months after seeding or turfing) between April and September when the weather is fair, the soil moist and when the grass and moss are actively growing.

For best results apply in calm warm weather. Avoid mowing the lawn 3 days before and after treatment.

Do not apply during freezing conditions or when rain is likely within 6-8 hours.

Do not apply to lawns suffering from drought.

Do not apply on windy days to avoid drift onto flowerbeds and neighbouring plants.

Do not re-seed or turf within 8 weeks of last treatment.

"How do I use it?"

Open one twin sachet and pour contents (200g product) into 9L (2 gallons) of water in a watering can fitted with a coarse rose or sprinkle bar. Stir thoroughly and apply evenly over 10 sq.m of lawn. Wash out equipment thoroughly after use. To avoid staining keep product off clothing, paved areas and other hard surfaces.

"Dosing guidelines"

Water Volume	No. of twin packs	Area treated
9L	1	10m ² /108ft ²

DO NOT SEPARATE THE INDIVIDUAL SACHETS OF THE TWIN PACKS

This EverGreen® Mosskil Soluble box contains twin packs which comprise of two adjoined sachets A and B: sachet A contains fertiliser and sachet B contains water soluble powder (SP) formulation of 31.3%w/w ferrous sulphate. Sachet B is classified as 'HARMFUL IF SWALLOWED' and 'IRRITATING TO EYES'. This equates to an overall content of 31.3%w/w anhydrous ferrous sulphate.

PROTECT FROM FROST

"What about my children & pets?"

CHILDREN AND PETS can play on treated lawn once dry.

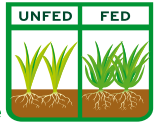

Why do I need to treat my lawn?

Lawns need nutrients to stay healthy and green. The three most important nutrients are:

N Keeps your grass green and thick
19.5% nitrogen

P Makes roots strong
1.5% phosphorus pentoxide

K Makes leaves strong and healthy
1.8% potassium oxide

EverGreen® Mosskil Soluble contains a unique and effective blend of nutrients specially developed by our lawncare scientists. The proportions of these nutrients are represented by the NPK score:

19.5 - 1.5 - 1.8 with Iron.

The formula feeds the lawn right down to the roots making it stronger.
