

ANTSTOP! GUN™

For use only as a home/garden insecticide for the control of ants, cockroaches, earwigs and insect pests. A fast acting spray that kills Ants and other crawling insects on contact and gives long lasting protection against their return.

DIRECTIONS FOR USE:

When To Use: As soon as you see the ants (or other crawling insects).

How To Use: Shake well before use. Press down firmly on top of trigger head immediately behind yellow nozzle to depress safety tab. At the same time, twist nozzle to spray position (1/4 turn either way)

TO KNOCKDOWN AND KILL: Spray directly at the insects at a distance of 30cm (1ft). Pump the trigger with a regular action until the surface is damp but not wet.

FOR LONG TERM CONTROL: Spray along the surfaces where you have seen the insects active and around the places (doors, windows, skirting) where they are gaining entry.

TO CONTROL FLEAS: Treat the areas they typically inhabit - gaps in furniture and carpets.

Repeat all treatments as soon as you notice any renewed activity

If you are spraying valuable or delicate surfaces, test the spray on a small, inconspicuous area before treating fully.

The protection provided by ANT STOP GUN! will be reduced or ended if the sprayed area becomes wet or is washed. For renewed protection treat the area again.

Do not apply to unprotected electrical equipment or to the moving parts of any machinery.

Do not re-use container.

Do not apply on or around drains.

PROTECT FROM FROST

STATUTORY CONDITIONS RELATING TO USE.
