Levington and Azalea, Camellia & Rhododendron 'Plus' are registered Trade Marks of The Scotts Company or its affiliates.

Why use Levington Azalea, Camellia & Rhododendron 'Plus'?

-  This ready to use plant food contains a special mix of nutrients just for acid loving plants to ensure they thrive, giving you healthier plants with bigger blooms and greener leaves.
-  Alkaline, chalky and lime soils are not ideal for growing acid loving plants. These soils lack iron, which is essential for these plants to flourish. Yet by applying Levington's Granular Plant Food regularly your plants will be able to absorb the vital iron quickly and easily.
-  Levington's ready to use Granular Plant Food cures those unsightly yellowing leaves caused by lack of iron.

How and when to use

1

2

3

As a guide one handful of granules is approximately 20g.

For Established Plants

1. Sprinkle evenly 70g per m² of granules at the base of the plant.
2. Work into the soil. Water thoroughly.
3. Feed twice, at planting time and at first flowering.

Planting New Plants

1. Sprinkle evenly 70g per m² of granules.
2. Work into the soil prior to planting. Water thoroughly.

For alkaline, chalky and lime soils plus plants with yellowing leaves.

Repeat application of 70g per m² one month after first application.
