

Environmental Information

At Scotts we are justly proud of our environmental record and our concern for the environment, both at our production facilities and in your garden. With this in mind we continue to develop outstanding, consistent growing media using a range of peat based, reduced peat and peat free ingredients, many of which make use of otherwise waste material.

Over the last decade we have significantly reduced the proportion of peat we use in our composts and will continue to do so. We do not harvest any peat from SSSI or SAC sites and are actively involved in helping the management and restoration of the peat land areas that we harvest from.

As we continue to work towards reduced peat formulations we are continually introducing new materials into our products. This may mean that you notice a difference in the appearance of your compost from year to year. Rest assured, any changes to our formulas are rigorously tested so we can guarantee the product you are using is as good as, if not better, than before.

Enriched
with recycled
materials
for optimum
growth

We recommend you always wear gloves when gardening.

When, Where and How to Use:

Suitable for use all year round in:

- Hanging baskets
- Pots & tubs
- Window boxes

Levington® container & hanging basket compost

THE PROFESSIONAL

GROWERS' CHOICE

Levington® Tub & Hanging Basket Compost

contains a unique blend of nutrients which makes it ideal for use in pots, tubs and baskets.

*Trials prove that Levington® Tub & Hanging Basket Compost absorbs 50% more water than ordinary Multi Purpose Compost.

NITROGEN (N)	For greener leaves and healthy shoots
PHOSPHATE (P)	For strong root development
POTASSIUM (K)	For fruit and flowers
TRACE ELEMENTS	Essential for all round plant health and disease resistance
WATERLOCK SYSTEM	Levington® has a patented wetting agent that absorbs 50% more water than ordinary multi purpose composts without getting water logged
PATENTED WETTING AGENT HOLDS IN EXTRA MOISTURE	Levington® Container & Hanging Basket Compost contains twice as much patented wetting agent as standard compost

Where not to use

Not suitable for ericaceous/lime hating plants, such as Rhododendrons, Azaleas, Camellias and Heathers. We recommend Levington® Ericaceous Compost for these plants.

This product is for home garden use and retail sales only. For commercial production use Levington® Professional growing media.

Hanging Baskets

Place the hanging basket on a flowerpot to keep it steady. Line the basket if necessary and part fill it with Levington® Container & Hanging Basket Compost. Insert plants through the sides of the basket where possible to ensure a ball of colour. Fill the basket with compost and arrange plants on the top with trailing ones around the sides. After everything is planted, firm lightly and water thoroughly.

Containers

Ensure that the container has sufficient drainage holes, then fill with Levington® Container & Hanging Basket Compost. Add your chosen flowers and firm lightly then water thoroughly.

Caring for Your Plants

WATERING: Plants should be kept moist at all times and not allowed to dry out. Plants should not be left to stand in water for any long periods of time, as it will encourage root rot.

FEEDING: After 6 to 8 weeks, we recommend regular feeding with Miracle-Gro® All Purpose Plant Food.

Premium Guarantee

If you are not completely satisfied with the performance of this product we offer you your money back.
