

Levington®

Decorative Chipped Forest Bark

ENVIRONMENTAL INFORMATION:

Levington Decorative Chipped Forest Bark is an entirely natural bi-product from the timber industry.

A larger grade of chipped bark that is long lasting and ideal for Flower beds, Borders, and Paths. Pleasant to handle with a fresh and pure pine aroma.

LEVINGTON DECORATIVE BARK:

A natural bi-product which is ideally used for low maintenance gardening and decorative purposes. Levington Decorative Chipped Forest Bark is also an excellent mulch and weed suppressant. Whilst keeping those unsightly weeds at bay, the large chips help to maintain valuable water within the soil beneath.

The contents within this bag are entirely natural and is made from waste bark from the Timber Industry. A 100% bi-product which is graded down to make Levington Decorative Chipped Forest Bark that is pleasant to handle with a pine aroma.

WHY USE:

Levington Decorative Chipped Forest Bark is not only a natural bi-product but it is also an excellent choice that can help to enhance the appearance of your garden in many areas, (even your amenity areas).

The large sizes of the chip means that Levington Decorative Chipped Forest Bark is excellent at suppressing weeds and reducing the number of times you will have to weed.

Valuable water within the soil or compost is often lost. By placing a layer of Levington Decorative Chipped Forest Bark, essential water is retained.

Extreme weather conditions can often cause soil erosion, damaging the precious roots of your plants. A layer of Levington Decorative Chipped Forest Bark can protect your plants and also the top layer of the soil.

WHEN TO USE:

Use around your roses, flowers, shrubs and trees.

Paths and driveways can also be covered with Levington Decorative Chipped Forest Bark. Flower beds, borders and large containers are also excellent places to use Levington Decorative Chipped Forest Bark.

WEED SUPPRESSION:

Prepare the site by removing all the weeds. This can be achieved by raking through the top layer of soil. Or otherwise, a specific weedkiller can be used to remove weeds from your beds and borders. Remember always read the label. Use pesticides safely.

If required apply Miracle-Gro® Plant food (see pack for details) to the soil before laying down Levington Decorative Chipped Forest Bark. Or you can add the plant food afterwards and then rake through into the bark.

Levington Decorative Chipped Forest Bark will need to be laid and spread evenly over the soil or compost to a thickness of 25mm to 50mm (1" to 2"), this can be achieved by either using a rake or by hand.

For the most effective weed suppression, the minimum depth needs to be 50mm (2"). Plastic sheets can also be laid down over the soil prior to laying the bark.

Note that this pack will cover the following areas according to the depth used:-

25mm - covers 3m² 50mm - covers 1.5m²

MULCHING:

Use as Mulch around your Shrubs, in Flower beds also Containers to keep in valuable water and suppress those unwanted weeds.

Using a fork or even your hands spread an even layer about 25mm to 50mm (1" to 2") of the Levington Decorative Chipped Forest Bark over the compost or soil.
