

Specially formulated to contain recycled material for optimum growth

Levington Houseplant compost is a premium blended compost as used by many professional gardeners and growers. Levington Houseplant compost has a special combination of ingredients for your houseplants. Enriched with all of the essential plant nutrients to guarantee you stronger, healthier and more colourful plants.

Levington Houseplant compost contains a unique blend of nutrients:

NITROGEN (N)	For greener leaves and healthy shoots
PHOSPHATE (P)	For strong root development
POTASSIUM (K)	For fruit and flowers
TRACE ELEMENTS	Essential for all round plant health and disease resistance
WATERLOCK SYSTEM 	Levington® has a patented wetting agent that absorbs 25% more water than ordinary multi purpose composts without getting water logged
PATENTED WETTING AGENT HOLDS IN EXTRA MOISTURE	Levington® Houseplant Compost contains twice as much patented wetting agent as standard compost

Size Guide This pack fills approximately:

XS	8L	1x or 1x 	1 SMALL 25CM (10") POTS, 1 HANGING BASKETS
----	----	--	---

Where not to use:

Not suitable for ericaceous/lime hating plants, such as Rhododendrons, Azaleas, Camellias and Heathers. We recommend Levington® Ericaceous Compost for these plants.

Environmental Promise:

At Levington we are justly proud of our environmental record and our concern for the environment, both at our production facilities and in your garden. With this in mind we continue to develop outstanding, consistent growing media using a range of peat based, reduced peat and peat free ingredients, many of which make use of otherwise waste material.

Premium Guarantee:

If you are not completely satisfied with the performance of this product we offer you your money back.

*Trials prove that Levington® Houseplant Compost absorbs 25% more water than ordinary Multi Purpose Compost.

Re-Potting House Plants:

Levington Houseplant compost can be used to pot on. This is best done in the spring, when plants are actively growing. Often when the roots are appearing through the drainage holes, potting on to the next size of pot is required. Water the plant thoroughly. Place a layer of Levington Houseplant compost in the base of the new pot. Remove the plant from the pot by tapping the base of the container and place in the centre of the new one. Fill the space around the root ball, ensuring that the compost level is the same as it was originally and firm gently. Water the plant well.

Potting on of Seedlings:

Fill pot with Levington Houseplant compost and lightly firm. Make holes into the compost with a dibber. Gently ease seedlings from original container by lifting the roots with a dibber. When handling seedlings gently hold by the young leaves and place into the hole in the new compost. Gently firm in. Keep soil moist without saturating. Do not allow compost to dry out.

Propagation of Cuttings:

Fill pot or tray with Levington Houseplant compost and lightly firm. Water the compost using a watering can with a fine rose ensuring that it is moist but not saturated. Make a hole in the compost with a dibber. Insert cutting and firm compost around the stem. Cuttings will root better and are less likely to show stress if the container is covered with a clear polythene bag or placed in a propagator. Keep compost moist with gentle watering but do not over water.

Care for your plants:

Levington Houseplant compost provides all of the necessary food for up to 6 weeks. After 4 to 6 weeks, we recommend Miracle-Gro® Plant Food (see pack for details). Not only will this specialist compost and plant food provide the best environment for your plants, they will also continue to grow in a healthy and abundant way, enabling flowering plants to bloom more profusely

Houseplant compost should be kept moist at all times and it should never dry out. Plants should not be left to stand in water for long periods as this will encourage root rot.

For Gardening Advice:

For further advice on gardening or on any Levington® compost contact our expert gardening advisors on 0870 5301010 or visit our website:
