

Special Blend of Organic Nutrients

Levington® Organic Blend is a premium range of soils, soil improvers and growing media as used by many traditional gardeners. Through a wealth of knowledge gained over 40 years of research, we have developed a unique combination of ingredients for Levington. Our Organic Blend range is made from specially selected natural materials to provide a healthy, organic environment for your plants.

Levington Organic Blend Farmyard Manure contains HUMUS - increases yield naturally

Levington Organic Blend Farmyard Manure is a 100% organic soil conditioner designed to add humus and nutrients to the soil. This improves the soil structure, increases microbial activity in it and invigorates plants with nutrients and trace elements. It can be dug in, used as a surface mulch or to improve soil quality when planting. Use Levington Organic Blend Farmyard Manure to naturally increase the yield and improve the vitality of:

- Roses and flowers
- Fruit
- Vegetables

When, Where and How to Use:

Soil Improvement

Spread a 5-8cm (2-3 inch) layer of Levington Organic Blend Farmyard Manure over the soil surface and dig in. This will improve drainage and structure of clay soils and the fertility and moisture holding capacity of sandy and chalky soils.

Before Sowing and Planting

Fork in Levington Organic Blend Farmyard Manure liberally to the soil surface and to the bottom of planting holes, drills and trenches for an abundant crop of flowers, fruit and vegetables. Improve the soil used to fill planting holes and trenches with one part Levington® Organic Blend Farmyard Manure to two parts existing soil.

Usage and Storage

Use the compost directly from the bag. Wear gloves when handling. Seal bag after use. Not suitable for ericaceous plants such as camellias, azaleas and rhododendrons. We recommend Levington® Ericaceous Compost for these plants.

Environmental Information

At Scotts we are justly proud of our environmental record and our concern for the environment, both at our production facilities and in your garden. With this in mind we continue to develop outstanding, consistent growing media using a range of peat based, reduced peat and peat free ingredients, many of which make use of otherwise waste material.

Over the last decade we have significantly reduced the proportion of peat we use in our composts and will continue to do so. We do not harvest any peat from SSSI or SAC sites and are actively involved in helping the management and restoration of the peat land areas that we harvest from.

As we continue to work towards reduced peat formulations we are continually introducing new materials into our products. This may mean that you notice a difference in the appearance of your compost from year to year. Rest assured, any changes to our formulas are rigorously tested so we can guarantee the product you are using is as good as, if not better, than before.

Levington® ORGANIC BLEND farmyard manure

Vegetable Plots and Allotments

In spring spread a 5-8 cm (2-3 inches) layer of Levington Organic Blend Farmyard Manure over soil and dig in before sowing or planting. On heavy clay soils repeat when winter digging.

Established Beds and Borders

Spread a 5-8 cm (2-3 inches) layer of Levington Organic Blend Farmyard Manure beneath the branches of roses, shrubs, fruit trees and bushes. Allow a 5-8cm (2-3 inches) gap around stems. This 100% organic mulch will help the soil retain moisture, suppress weeds and release food to surrounding plants.

Plant Invigoration

In spring, apply a layer of Levington Organic Blend Farmyard Manure approximately 5-8cm (2-3 inches) deep onto the clean soil around established herbaceous flowers, shrubs, fruit and vegetables and work into the soil surface. It will add nutrients for better yields and vital plant development.

New Lawns

Spread a layer of Levington Organic Blend Farmyard Manure 5-8cm (2-3 inch) deep onto clean soil and dig into the top 10-15cm of soil for improved grass seed germination and quicker establishment of turf.

Premium Guarantee

If you are not completely satisfied with the performance of this product we offer you your money back.

We recommend you always wear gloves when gardening.

Online product labels are current at the time of uploading.
Always read the label on your purchased product before use.
