How to use

Beds & borders

Dig a hole twice the size of the root ball.

Position the plant and fill with 50% soil and 50% compost.

Firm around the base and water thoroughly.

Pots, containers & hanging baskets

Place a layer of compost in the base of the pot/basket.

Tap out the plant from the old pot and place in the centre of the new one.

Fill the space around the root ball, ensuring the compost level is the same as it was originally.

Firm lightly and water thoroughly.

Seeds, seedlings & cuttings

Fill small pots with compost.

Push large seeds or base of cuttings below the compost surface.

Firm lightly and water thoroughly.

USEFUL TIPS

We recommend feeding your plants with Miracle-Gro All Purpose Plant Food after 3 months.

Move your plants into a larger container of fresh compost when roots completely fill the pot.

For best results when sowing seeds use Miracle-Gro Seed and Cutting compost.

Not Suitable for ericaceous plants, for these we recommend Miracle-Gro Azalea, Camellia & Rhododendron compost.

This pack fills approximately

2 small pots 25cm (10")

or

1 medium pot 32cm (13")

or

2 hanging baskets

Storage

- Keep the bag closed when in storage to prevent drying out.
- Storage from one year to another may affect performance.
- Keep away from pesticides.
- Occasionally a white mould appears on the compost. This is not harmful to your plants and should disappear naturally.

Environmental policy

Scotts Miracle-Gro is proud of its environmental record and committed to further progress. With this in mind, we continue to develop consistently outstanding compost, whilst reducing peat wherever possible.

Our range includes reduced peat, and peat free options. We replace peat with naturally occurring, sustainable alternatives such as wood fibre, composted bark and coir.

How much peat in this product?
