Bulb Booster

Grow spectacular bulb flowers with Miracle-Gro Bulb Booster!

These patented granules provide slow release nutrients that feed for up to 3 months and will deliver nourishment to your planted bulbs, encouraging vigorous root growth and lush foliage which is required to support more abundant flowering the following season.

Miracle-Gro Bulb Booster is great for use on all types of bulb flowers including tulips, hyacinths and daffodils.

How To Use For Best Results

- 1 Simply scatter the granules on the soil around all of your bulbs or, when planting or feeding individual bulbs, mix ½ teaspoon for small bulbs to 1 teaspoon for large bulbs in the soil used to cover the bulb.
- 2 Gently work the granules into the soil or mix thoroughly into compost to allow the nutrients to release directly to the root system.
- 3 Apply at planting time and again just after flowering for new bulbs, or at flowering for established bulbs to provide the bulb with a sufficient store of nutrients for the following season.
- 4 After application, water in thoroughly to begin the slow release feeding process.
