How to use

Place the required number of tablets evenly onto the compost surface (see dosage table).

Push the tablets at least 5cm into the compost.

For best results apply from February so your plants receive the benefit.

Pot width	No. of tablets Indoor plants & small plants (Impatiens, Antirrhinum)	No. of tablets Outdoor plants & vigorous plants (Geranium, Petunia)
up to 13cm	1	1-2
13-20cm	1-2	2-3
above 20cm	2-3	3-5

For balcony boxes or hanging baskets use 1 tablet per plant

USEFUL TIPS

- Water regularly according to the plant's needs.
- Wash hands after use.
- Reseal pack after use and store in a dry place to preserve the best product quality.
- After 6 months you may find that the tablets are still present. Don't worry - they have worked! The plant food has been released slowly from the granules, leaving behind the coating. We recommend that you remove the tablets from the compost and replace with new tablets.
