How to use

Evenly scatter granules over the compost or soil around your plants.

Gently work the granules into the soil or mix thoroughly into compost.

After application, water in thoroughly.

Reseal pack, store in a cool dry place. Wash hands after use and store out of reach of children.

As a guide one closed handful of granules is approximately 25g.

When planting vegetables and strawberries sprinkle 75g per square metre. Reapply once or twice during the growing season.

When planting fruit trees and bushes mix 50-125g per plant evenly into the compost or soil. Reapply once during the growing season.

For existing plants apply 75g per metre of plant height. Sprinkle over the soil area covered by the spread of the branches. Use 2 or 3 times during the growing season.

- Crop regularly to ensure a continuous supply of leaf. Herbs that are allowed to flower may not produce such good crop/last as long.
- Feed with Miracle-Gro Pour & Feed herb plant food.
