

SOIL IMPROVER

Why use Miracle-Gro Soil Improver?

- Enriched with organic plant food to feed plants for up to 6 weeks.
- Ideal for use in beds, borders and vegetable patches.
- Benefits heavy clay soil by improving drainage and reducing compaction.
- Improves sandy soil by retaining moisture and plant nutrients.

*compared to ordinary garden soil

How to use:

1. For general soil improvement in beds, borders and vegetable patches fork in a 3 cm layer of Miracle-Gro Soil Improver into the top 10cm of the existing garden soil.

2. To create raised beds mix with existing garden soil. Use a 50/50 mix of soil improver to existing garden soil and fork through thoroughly.

3. When planting fruit bushes and trees, dig a hole, twice the size of the root ball. Fork in a small amount of soil improver and fill with a 50/50 mix of soil improver and existing garden soil. Firm around the base and water thoroughly.

4. Can be used as a mulch around your shrubs, containers or beds, to keep in valuable water. Using a fork spread an even layer approximately 5cm deep over the existing compost or soil.

5. To provide effective weed suppression use a minimum of 5cm of soil improver over the soil surface. This should be maintained once a year.

6. Feed with Miracle-Gro Plant Food after 6 weeks.

We recommend you always wear gloves when gardening.

Environmental policy:

At Miracle-Gro we are justly proud of our environmental record and our concern for the environment, both at our production facilities and in your garden. With this in mind we continue to develop outstanding, consistent growing media using a range of peat based, reduced peat and peat free ingredients, many of which make use of otherwise waste material. This product has been categorised as the following:

ZERO PEAT	LOW PEAT	REDUCED PEAT	HIGH PEAT
0%	approx 40% - 60%	approx 60% - 90%	over 90%
