### Why use pots & baskets enriched compost?

- Exclusive Aquacoir formulation stores and releases water when plants need it, taking the guess work out of watering.
- Ideal for use in hanging baskets, pots and containers.
- Perfect for preventing plants from drying out with our special water retaining agent.
- For continued fantastic results with the hungriest plants we recommend that you begin feeding with Miracle Gro plant food as soon as the leaves begin to pale.

**Grows plants twice as big... guaranteed!**

Ordinary garden soil

Miracle-Gro Moisture Control pots & baskets enriched compost

### How to use

#### Hanging baskets

Line the basket, if required with moss or other liner.

Half fill basket with compost and plant trailing plants around edges.

Plant more trailing plants around the baskets edge and upright plants in the centre.

Fill the rest of the basket with compost, firm lightly and water thoroughly.

#### Pots & containers

Place a layer of compost in the base of the pot/basket.

Tap out the plant from the old pot and place in the centre of the new one.

Fill the space around the root ball, ensuring the compost level is the same as it was originally.

Firm lightly and water thoroughly.

#### USEFUL TIPS

We recommend feeding your plants with Miracle-Gro All Purpose Plant Food after 6 months.

Move your plants into a larger container of fresh compost when roots completely fill the pot.

#### This pack fills approximately

7 small pots 25cm (10") or 3 medium pots 32cm (13") or 1 large pot 42cm (17") or 7 hanging baskets

#### Storage

- Keep the bag closed when in storage to prevent drying out.
- Storage from one year to another may affect performance.
- Keep away from pesticides.
- Occasionally a white mould appears on the compost. This is not harmful to your plants and should disappear naturally.

#### Environmental policy

Scotts Miracle-Gro is proud of its environmental record and committed to further progress. With this in mind, we continue to develop consistently outstanding compost, whilst reducing peat wherever possible.

Our range includes reduced peat, and peat free options. We replace peat with naturally occurring, sustainable alternatives such as wood fibre, composted bark and coir.

#### How much peat in this product?
