Miracle-Gro compost contains a unique and revolutionary Fibresmart Technology.

The hollow wood fibres are 100% natural and peat free. They ensure the optimum balance of air and water for strong roots to grow healthy, beautiful plants.

## How to use

### Pots, containers & hanging baskets

Place a layer of compost in the base of the pot/basket.

Tap out the plant from the old pot and place in the centre of the new one.

Fill the space around the root ball, ensuring the compost level is the same as it was originally.

Firm lightly and water thoroughly.

### Seeds, seedlings & cuttings

Fill small pots with compost.

Push large seeds or base of cuttings below the compost surface.

Firm lightly and water thoroughly.

## Storage

- Keep the bag closed when in storage to prevent drying out.
- Storage from one year to another may affect performance.
- Keep away from pesticides.
- Occasionally a white mould appears on the compost. This is not harmful to your plants and should disappear naturally.

## Environmental policy

Scotts Miracle-Gro is proud of its environmental record and committed to further progress. With this in mind, we continue to develop consistently outstanding compost, whilst reducing peat wherever possible. Our range includes reduced peat, and peat free options. We replace peat with naturally occurring, sustainable alternatives such as wood fibre, composted bark and coir.
