

UK/RoI Fertiliser Declaration

EC FERTILISER

NPK(Mg) Fertiliser with micronutrients, Blend- 17-9(4)-11(9.1) with trace elements

Nitrogen (N) total	17.0%
Nitric nitrogen (N)	7.7%
Ammonical nitrogen (N)	9.3%
Phosphorus pentoxide(P_2O_5) soluble in neutral ammonium citrate and in water	9.0% (3.9%P)
Phosphorus pentoxide(P_2O_5) soluble in water	6.8% (3.0%P)
Potassium oxide (K_2O) soluble in water	11.0% (9.1%K)
Magnesium oxide (MgO)	2.0% (1.2%Mg)
0.01% Boron water soluble	
0.032% Copper (Cu); 0.022% water soluble	
0.24% Total Iron (Fe); 0.02% water soluble;	
0.09% chelated by EDTA	
0.03% Total Manganese (Mn); 0.01% water soluble	
0.012% Molybdenum (Mo) water soluble	
0.009% Zinc; 0.006% water soluble	

* Versus unfed.

Why use Miracle-Gro Plant Food?

- The granules release tiny amounts of plant food each day, ensuring that plants are not short of balanced nutrients over the 6 month growing season.
- One simple application feeds your plants for the whole season, removing the need for regular feeding.

How and when to use

- 1 Unscrew cap and remove seal, then replace the cap.
- 2 Evenly scatter granules over the compost or soil using the convenient shaker cap for easy, no mess application.
- 3 Gently fork granules into the top of the soil or mix thoroughly into compost. Reseal pack, store in a cool dry place and wash hands after use.
Remember to water plants regularly trying not to over water or allow the soil / compost to completely dry out.
- 4 For best results apply in early spring so your plants are fed all through the season.

How much to use

Established Plants

All Flowers and Vegetables

Sprinkle evenly at 75g/m² over whole rooting area. As a guide one handful of granules is approximately 25g.

Ornamental and Fruit Trees

Sprinkle evenly over soil area covered by spread of branches. Apply 50g for every metre of trees height.

Containers and Hanging Baskets

For best results mix granules with compost before planting (25g of granules per 10 litres of compost).

New Plants

Annual Bedding Plants and Vegetables

Prior to planting or sowing sprinkle 75g/m² over soil

Planting new Trees, Shrubs, Roses & Fruit Bushes

Make a hole large enough for the roots and place the plant in the hole. Half fill with soil. Sprinkle granules evenly around the roots (25g per 10 litres of compost or soil).
