

## WHY USE BARK?

Our composted bark has excellent moisture retaining properties, ideal for decorative purposes and low maintenance gardening. It is an entirely natural by-product of the UK timber industry.

Using bark is an excellent way to reduce water loss in the garden. It reduces evaporation from the soil surface and keeps moisture around the plant roots, reducing the need for watering.

Composted bark helps to improve soil structure when incorporated into the soil surface.

## HOW TO USE

All around the garden

Composted bark is perfect for a 'no dig' garden - it helps to suppress weeds, improve soil structure and enrich your soil quality. Use it in beds, borders, and anywhere around the garden that tired soil might need some improvement.

Our composted bark is easy to lay on any surface and requires very little maintenance.

## BEDS AND BORDERS

1. Remove all weeds from the bed or border.
2. Ensure the soil is moist around the plants, by watering if necessary, prior to application. This will help aid moisture retention around the plants.
3. Spread a layer of Levington® Composted Bark at 2.5 cm (1") deep around plants.
4. For healthy and beautiful plants in your beds and borders, we recommend **Levington® Soil Conditioner** when planting, and adding a Levington® soil supplement such as **Levington® Chicken Manure** to enrich the soil.

## POTS, CONTAINERS AND WINDOW BOXES

Creates a smart finish to your pots and containers.

1. Remove all weeds from the area.
2. Ensure the soil is moist around the plants, by watering if necessary, prior to application. This will help aid moisture retention around the plants.
3. Spread a layer at 2.5 cm (1") around the plants.

## HEALTH, SAFETY & STORAGE ADVICE

- Use in a well ventilated place and avoid breathing in dust.
- Wash hands after use.
- Open bag carefully and reseal after use.
- Store in a cool place, away from direct sunlight.
- Sometimes you might see some white mould on your bark. This is not harmful to your plants and will disappear naturally.
- Keep away from pesticides.

## HOW IT WORKS

**Enriches poor soil.** By using composted bark, you are adding organic matter to your soil, which adds nutrients and improves quality.

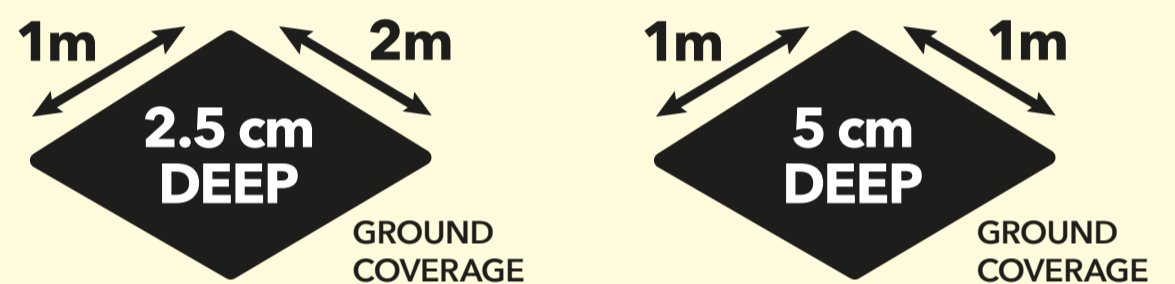

Composted bark provides a **lovely texture** to encourage air flow and water retention, **improving soil structure** so plants can flourish.

Our composted bark is **plant based** and perfect for vegans.

## HOW MUCH BARK IS IN THE BAG

## OUR STORY

Established in 1967, Levington has been providing expertise, research and innovation into compost for over 50 years. When it comes to compost, Levington has been the gardener's choice for decades.

At our officially recognised research station in Levington, Suffolk, we are constantly innovating and testing for the best combinations of ingredients in compost to ensure your plants are strong and healthy.

## SUSTAINABILITY

Our bark is sustainably sourced and FSC mix certified from UK forests.
