

Levington®

TOMORITE®

Pour & Feed™

Ready to Use Tomato Food

Levington® Tomorite® Pour & Feed™ enriched with seaweed extract is a ready to use liquid feed for tomato plants. It encourages high yields of top quality full-flavoured tomatoes. It is also ideal for other food crops such as sweet peppers and aubergines.

How to Use:

Easy to apply – no dilution, no hassle! Add two capfuls (2 x 50 ml) of **Levington® Tomorite® Pour & Feed™** to the base of the plant, taking care to avoid foliage. After each feed water in.

Where to Use:

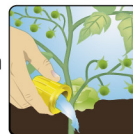

GREENHOUSE

Start feeding when the first truss of tomatoes (stem with small green fruits) has set.

Feed once every week and increase to twice a week when second truss has set.

OUTDOORS

Start feeding when the second truss of tomatoes (stem with small green fruits) has set.

Grow bags (Outdoor):

Continue to feed every week.

In the garden:

Continue to feed every 7-14 days.

Hints and Tips:

Levington® Tomorite® Pour & Feed™ is ideal for feeding Grow Bags and Planters.
