

At Levington we are justly proud of our environmental record and our concern for the environment, both at our production facilities and in your garden. With this in mind we continue to develop outstanding, consistent growing media using a range of peat based, reduced peat and peat free ingredients, many of which make use of otherwise waste material.

- PLANTING** Shake the bag to distribute the contents. When only planting two plants use the end panels. Delay planting tomatoes until the first flower opens.
- WATERING** After planting, water in using about 4.5 litres (approx. 1 gallon), and then water as necessary to keep the bag moist.
- FEEDING** We recommend feeding 20ml of Tomorite in 4.5 litres (1 gallon) water. Use 4.5 litres of diluted Tomorite for most crops, once a week for heavy feeders such as tomatoes under glass.
- SUPPORTING** Avoid piercing the bottom of the bag. Train plants to fan out so that they receive maximum light and air.

CROP	PLANTS PER BAG	START FEEDING WHEN
Tomatoes - under glass	3	The fruit on first truss is pea sized
Tomatoes - outdoor	3	The fruit on second truss is pea sized
Peppers & Aubergines	3	The fruit is the size of a golf ball
Melons	2	The first fruit is swelling
Courgettes/Marrows/Cucumbers	2	The first picking commences
