

Professional

African Violet & Cyclamen Mix

Osmocote® Professional African Violet & Cyclamen Mix was developed by horticultural experts especially for potting African Violets and Cyclamens. Engineered as a low salt formula, it provides the ideal nutrient environment for healthier and better African Violets and Cyclamens.

- Contains Osmocote® controlled release plant food – feeds plants for up to 6 months.
- Formulated with low Nitrogen, high Potassium and high Calcium to encourage continuous flowering.
- Granular wetting agent added to ensure uniform wetting of mix and prevent drying out.
- Low salt formula to prevent leaf tip burn.

This mix complies with the requirements of AS3743 for a premium grade potting mix

HAZARDOUS

COMPOSTS, POTTING MIXES AND OTHER ORGANIC MATERIALS

This product is made from organic materials, including composted pinebark, and contains living micro-organisms, including bacteria, fungi and protozoa. Also contains mineral and fertiliser additives.

RISK

Inhalation of dust and/or liquid mists may irritate, inflame or sensitise the nose, throat and lungs resulting in illnesses ranging from hayfever or asthma, to pneumonia (e.g. Legionnaire's disease) or pneumonia-like illnesses. Direct contact with this material or its dust and/or liquid mists (bioaerosols) may cause skin irritation (dermatitis), and skin or eye infection or irritation. People particularly at risk are those suffering from asthma or allergies, and those whose immune defence systems are compromised.

SAFETY

Avoid contact with eyes and skin. Avoid breathing dust and/or liquid mists (bioaerosols). Wear suitable protective clothing and standard duty gloves (AS/NZS 2161.2). If exposed to dust and/or liquid mists, also wear dust resistant eye protection (AS/NZS 1336) and particulate respirator (AS/NZS 1715 and AS/NZS 1716). Wash thoroughly immediately after handling. Wash work clothes regularly. Clean up by wet sweeping or vacuuming. Store this product in a cool location.

FIRST AID

Irrigate eyes with plenty of water for 10 minutes. Wash skin with soap and water. Seek medical attention for any persistent skin, eye or respiratory symptoms.

DISPOSAL

Follow above safety precautions and collect in containers for disposal as trade waste in accordance with local authority guidelines.

Easy to use instructions

We recommend wearing gardening gloves when using all planting materials.

Where to use

Osmocote® Professional African Violet & Cyclamen Mix is suitable for potting African Violets and Cyclamens.

How to use

1. Use Osmocote® Professional African Violet & Cyclamen Mix straight from the bag. For best results, do not mix with any other material. Close the bag tightly after use.
2. Select a clean container with large drainage holes and partly fill the pot with Osmocote® Professional African Violet & Cyclamen Mix.
3. Turn the plant out of its existing container. Gently tease the old mix from the outside of the rootball, and gently remove any damaged or dried out roots.
4. Position the plant in the centre of the pot. Fill with Osmocote® Professional African Violet & Cyclamen Mix to within 1–2cm from the top of the pot and press lightly.
5. Tap the new container gently to allow the mixture to settle. Do not pack down.
6. Initial watering of the plant after potting is essential. Allow the excess water to drain away and place in the shade for 2–3 days to allow the plant to establish.

Handy Hints

...General Growing Tips for African Violets and Cyclamens

- Use a perfectly drained growing mix like Osmocote® Professional African Violet & Cyclamen Mix.
- Over watering is the most common problem in growing container plants. ScottsCoir™ retains water and slowly releases moisture, therefore let the mix dry to touch between waterings.
- When watering, thoroughly soak the mix and allow to drain. Never water over the foliage of African Violets or Cyclamens.
- African Violets and Cyclamens need a well-lit, well-ventilated but draught free spot.
- African Violets should not be positioned in direct sunlight.
- Cyclamens need high light intensity – preferably with an hour or two of sunlight each morning.
- Feed with Osmocote® controlled release fertiliser during the active growing season (spring, summer and autumn). Not required within 6 months of potting mix purchase.
