

Professional

Fruit & Citrus Potting & Planting Mix

Osmocote® Professional Fruit & Citrus Potting & Planting Mix has been specifically developed by horticultural experts as a **superior base for growing citrus and fruit trees.**

- Contains Osmocote® controlled release plant food – provides plant nutrition and trace elements for up to 6 months.
- Formulated with Next Generation water crystals and coir peat for better moisture retention.
- Professional grade wetting agent added for uniform soil wetting and to delay drying out.
- Boosted levels of Iron and Magnesium for healthy dark green foliage.

Easy to use instructions

We recommend wearing gardening gloves when using all planting materials.

Where to use

Osmocote® Professional Fruit & Citrus Potting & Planting Mix is suitable for all fruit and citrus trees including orange, lemon, lime and stone fruits. It can be used in pots as well as in-ground.

How to use

1. Use Osmocote® Professional Fruit & Citrus Potting & Planting Mix straight from the bag. For best results, do not mix with any other material. Close bag tightly after use.
2. Water plants that are to be repotted thoroughly, and allow them to drain.
3. Select a container with large drainage holes and partly fill the pot with Osmocote® Professional Fruit & Citrus Potting & Planting Mix. Turn the plant out of the existing container. Loosen the root ball. Position the plant in the centre of the new container, and fill with Osmocote® Professional Fruit & Citrus Potting & Planting Mix to 2cm from the top of the container. Tap the new container gently to allow the mix to settle, do not pack down.

4. For in-ground planting, dig a dish-shaped planting hole approximately one and a half times the size of the root ball of the plant and two times as wide. Turn the plant out of the existing container. Loosen the root ball. Place some Osmocote® Professional Fruit & Citrus Potting & Planting Mix in the bottom of the hole, then position the plant in the centre of the hole and fill with Osmocote® Professional Fruit & Citrus Potting & Planting Mix. Ensure that the top of the soil where the plant was in the container is on the same level as the ground.

5. Initial watering of the plant after planting is essential. Allow the excess water to drain away.

For Better Results

...Start it Right

- Good soil is critical for spectacular plants. Osmocote® Professional Fruit & Citrus potting and planting mix is formulated specifically to meet the structural and nutritional needs of a premium grade fruit and citrus mix.

...Feed it Right

- Fruit and citrus plants are hungry feeders, producing foliage, fruit and flowers all year round, and so require year round feeding. Begin a feeding program using Osmocote® Fruit, Trees & Citrus plant food following package instructions 6 months after planting.

This mix complies with the requirements of AS3743 for a premium grade potting mix.

HAZARDOUS

COMPOSTS, POTTING MIXES AND OTHER ORGANIC MATERIALS

This product is made from organic materials, including composted pinebark, and contains living micro-organisms, including bacteria, fungi and protozoa. Also contains mineral and fertiliser additives.

RISK

Inhalation of dust and/or liquid mists may irritate, inflame or sensitise the nose, throat and lungs resulting in illnesses ranging from hayfever or asthma, to pneumonia (e.g. Legionnaire's disease) or pneumonia-like illnesses. Direct contact with this material or its dust and/or liquid mists (bioaerosols) may cause skin irritation (dermatitis), and skin or eye infection or irritation. People particularly at risk are those suffering from asthma or allergies, and those whose immune defence systems are compromised.

SAFETY

Avoid contact with eyes and skin. Avoid breathing dust and/or liquid mists (bioaerosols). Wear suitable protective clothing and standard duty gloves (AS/NZS 2161.2). If exposed to dust and/or liquid mists, also wear dust resistant eye protection (AS/NZS 1336) and particulate respirator (AS/NZS 1715 and AS/NZS 1716). Wash thoroughly immediately after handling. Wash work clothes regularly. Clean up by wet sweeping or vacuuming. Store this product in a cool location.

FIRST AID

Irrigate eyes with plenty of water for 10 minutes. Wash skin with soap and water. Seek medical attention for any persistent skin, eye or respiratory symptoms.

DISPOSAL

Follow safety precautions and collect in containers for disposal as trade waste in accordance with local authority guidelines.
