

GRUB+INSECT

SLOW RELEASE LAWN FERTILISER

This product is specially formulated to provide deep uniform greening, while killing most common insect pests of lawns. The slow release fertiliser formula feeds the lawn as it needs to be fed, avoiding surge growth and extra mowing. The nutrient supply will last up to 10 weeks to ensure a stronger, healthier, greener lawn.

GRUB+INSECT

SLOW RELEASE LAWN FERTILISER

Army Worm

Black Ant

Bill Bug

Stem Weevil

CAUTION

- DO NOT apply when daytime temperatures are expected to exceed 30°C.
- DO NOT apply within 2 metres of water (ponds, creeks, dams and drains).
- DO NOT allow containers or granules to get into drains, sewers, streams or ponds.
- DO NOT feed grass clippings from treated areas to poultry or other animals.

STORAGE AND DISPOSAL

- Store in the closed original container in a cool, dry place out of the reach of children.
- Do NOT store in direct sunlight.
- Dispose of empty container by wrapping in paper, placing in a plastic bag and putting in the garbage.

SPILLS

- Sweep up spilled material and return to original container. Spoilt product should be disposed of as for empty container.

FIRST AID

If poisoning occurs, contact a doctor or poisons information centre. Phone Australia 131 126 or New Zealand 0800 764 766. For specialist advice in an emergency only, phone NZ 0800 734 607. If skin contact occurs, remove contaminated clothing and wash skin thoroughly. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

DIRECTIONS FOR USE	
For guaranteed results please read directions carefully. Do not apply when day temperatures are above 30°C.	
IMPORTANT: See CAUTION statements for essential information about use of this product.	
LAWN TYPE	PESTS CONTROLLED
Suitable for lawns containing common Couch, Bent, Kikuyu, Perennial Ryegrass, Chewings Fescue, Buffalo Grass, Blue Couch, Carpet Grass, Lippia and Dichondra.	Lawn Armyworm, Sod Webworm, Argentine, Stem Weevil, Cutworm, Billbug, Black Ant, Coastal Brown Ant, Funnel Ant, Meat Ant, Sugar Ant, Stinging Ant.

- ### HOW DO I APPLY IT?
- Apply when insect pests are first noticed or apply as a regular maintenance programme.
 - This product is ready to apply. **Apply evenly at the rate of 14g/ m².** Weigh out the amount required to treat a measured area of lawn, then spread evenly moving in a steady forward motion. For best results use a Scotts Spreader.
 - Apply to dry foliage then water in thoroughly.
 - If applying by hand, always wear gloves. Do not attempt to spread the product in one pass – you may under or over apply. Apply by passing over the treated area at least three times, moving in a different direction each time and applying about a third of the required amount each pass.
 - Retreating may be necessary, but wait at least three weeks to observe the full results of the first application.
 - To obtain even greening and insect control it is essential that the granules be applied evenly. Poor or no insect control will occur in untreated patches. Apply under calm conditions. Windy conditions will make even distribution difficult.
 - For a thick green lawn, apply Scotts Lawn Builder™ slow release fertiliser or Scotts Lawn Builder™ Grub + Insect at least three times per year.

APPLYING BY SCOTTS SPREADERS		
		
EvenGreen Drop Spreader - SETTING 8¼	EasyGreen Rotary Spreader - SETTING 29	HandyGreen Hand Held Spreader - SETTING 5

IMPORTANT: THIS PRODUCT IS NOT TO BE USED FOR ANY PURPOSE OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS AUTHORISED. See CAUTION statements for essential information about use of this product.

IMPORTANT:

This product when wet, will cause iron stains. Be sure to sweep all granules off paths, coping, paving, driveways, shoes, etc. immediately after use. Do not allow the granules to come into contact with these surfaces when wet.

PROFESSIONAL QUALITY GUARANTEE
