Lawn Builder™

Premium

SLOW RELEASE LAWN FERTILISER

Professional turf managers and home gardeners around the world rely on the Scotts Lawn Builder slow release technology to build thicker, greener lawns and recreational turf.

WHEN DO I FEED MY LAWN?

Apply anytime of year. For best results feed three times per year.

ONE ANNUAL FEEDING IN EARLY SPRING

SECOND ANNUAL FEEDING IN EARLY SUMMER

THIRD ANNUAL FEEDING IN AUTUMN

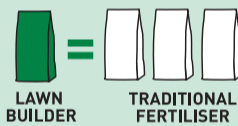

HOW MUCH WILL I NEED?

Lawn Builder is unlike traditional fertilisers as you use less to feed more.

To determine the size of your lawn in m², multiply the length by the width in metres.

- ¼ of a tennis court equals approx 65m²
- ½ of a tennis court equals approx 130m²
- 1 whole tennis court equals approx 260m²

You will need to apply **16g/m²** of your lawn.

This pack treats **930m²**
 That is more than 3 tennis courts!

HOW DO I APPLY IT?

DRY METHOD

During water restriction periods, apply to lawn without watering in. Scotts Lawn Builder is safe on lawn until next rain or watering, when evenly and correctly applied with a spreader. Guaranteed to green the lawn within one week of obtaining moisture.

FAST METHOD

Greener in 2 days with watering. For fast results apply to moist foliage, wait 24 hours then water in thoroughly.

Fertiliser application should be avoided if temperature is expected to exceed 30°C.

For best results use a Scotts Spreader, however if applying by hand ensure even distribution.

APPLYING BY SCOTTS SPREADERS

EvenGreen Drop Spreader - SETTING 3

EasyGreen Rotary Spreader - SETTING 27

Easy HandHeld Spreader - SETTING 4

NOTE: Setting 4 on the Easy HandHeld spreader applies half the recommended rate. If using the Easy HandHeld, move over the entire area in one direction at a slow, steady walking pace then repeat application in a perpendicular direction to give full, even coverage.

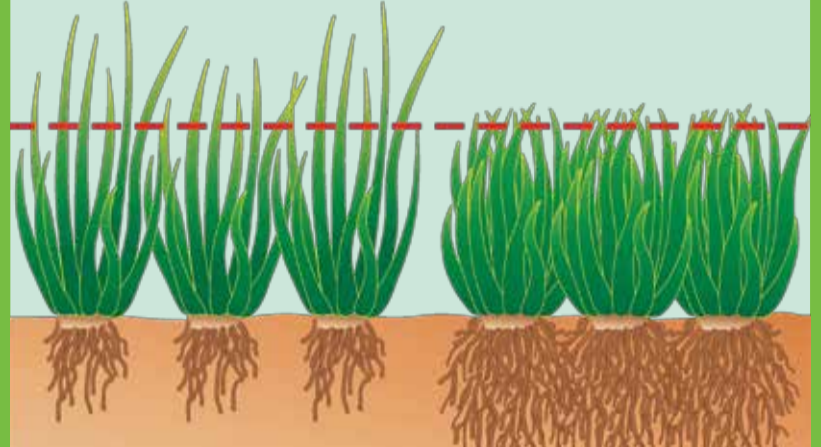

- Sweep excess granules off paths, driveways, shoes, etc. to avoid iron stains. See important note below.
- Do not use on a new lawn less than 8 weeks old. Use Lawn Builder Starter Fertiliser instead.
- Use half of the suggested rate for summer application on cool season grasses, e.g. Bent Grass.
- Scotts Lawn Builder is not recommended for use on other plants.

IMPORTANT

This product when wet, will cause iron stains. Be sure to sweep all granules off paths, coping, paving, driveways, shoes, etc. immediately after use. Do not allow the granules to come into contact with these surfaces when wet.

Scotts Lawn Builder delivers superior results vs traditional fertilisers

- Deeper green
- Thicker lawn
- No surge growth, less mowing
- Deeper root system
- Stronger plants

Traditional Fertiliser

Scotts Lawn Builder Fertiliser
