

Make the most of available water with Scotts Everydrop, designed to optimise water penetration and absorption into the soil and root zone, consistently and evenly. For use on gardens, pots, lawns and landscapes. Whether relying on rain, sprinklers or hoses, Scotts Everydrop helps maximise everydrop of water and **increases water absorption by 50%***.

Increases Water Penetration

Ideal for hydrophobic sandy soils, that dry out quickly. Gets water deep into dry soil. Watering becomes more effective and plant health improved. Your soil will hold onto **more water for longer** which will help your gardens and lawns flourish.

Improves Water Retention

Designed to help water disperse evenly into dry soils that repel water. Allows soil particles in garden beds and potting mixes to absorb water down to the root zone, allowing maximum rehydration, resulting in stronger, deeper root systems and improved soil health.

Long Lasting

Starts working immediately, and lasts for up to 6 months.

WHAT IS SCOTTS EVERYDROP®?

Scotts Everydrop is a unique formula designed to move water into the soil and root zone, consistently and evenly. This helps to reduce wasteful runoff and pooling. Whether relying on rain, sprinklers or hoses, Scotts Everydrop helps make the most of available water.

Enhanced depiction to illustrate untreated versus treated soil.

HOW TO USE SCOTTS EVERYDROP®?

25L will cover up to 500m²

GARDEN BEDS & LAWNS

- Sprinkle Scotts Everydrop over garden soil and lawns
- Water in thoroughly

TIPS

- Re-apply every 6 months for maximum effectiveness
- Apply more frequently in dryer periods

POTS, CONTAINERS & BASKETS

- Apply to the surface or mix through potting mix when planting
- 250mm (10 inch pot) 10mL
- 300mm (12 inch pot) 20mL
- 400mm (16 inch pot) 40mL
- Water in thoroughly

We recommend you always wear gloves when gardening.

*Based on standard vs treated growing media

IMPORTANT
KEEP OUT OF REACH OF CHILDREN AND PETS.
SEEK MEDICAL ADVICE IF INGESTED IN LARGE QUANTITIES.
STORE UNDER COOL CONDITIONS.
