

## HOW TO USE

- 1 Shake well before applying.
- 2 Connect garden hose to the hose-on applicator. A click-on hose fitting is required.
- 3 Remove the air breather plug from the top of the applicator.
- 4 When ready to apply, direct the container towards the area to be applied, and turn on the hose. Water mixes automatically with the concentrate in the correct ratio.
- 5 Apply over the area to be treated, moving the spray in a left to right arc for even coverage.
- 6 Re-apply frequently during dry conditions.

### GARDEN BEDS & LAWNS

Apply the contents of the bottle over 150 square metres. Water treated areas after application to wash solution off foliage.

### POTS AND BASKETS

Apply to pots and baskets as normal watering. Water treated areas after application to wash solution off foliage.

**Safety** If contact occurs with skin or eyes wash area with clean water.

Debco's **SaturAid** Wetting Agent is manufactured to the highest standards from premium quality materials to provide the home gardener with a reliable, non-toxic and easy to use wetting agent.

Over long periods of time soils and potting mixes may become dry or hydrophobic. Water repellence results from waxy organic compounds coating soil particles. Soils that repel water negatively impact the growth and health of plant life.

SaturAid's active ingredient works immediately to break down soil particles surface tension allowing maximum rehydration of soils and potting mixes.

**Increases water penetration** Gets water deep into dry soils. Watering becomes more effective and frequency is reduced.

**Improves water retention** Allows soil particles to absorb water at the root zone resulting in stronger, deeper root systems.

**Fast acting** SaturAid in liquid form starts working immediately.

**Non-toxic** Safe for all plant types and safe to use around ponds and waterways.
