

Debco
SaturAid[®]
Superior Wetting Agent

Debco's **SaturAid** Wetting Agent is manufactured to the highest standards from premium quality materials to provide the home gardener with a reliable, non-toxic and easy to use wetting agent.

Over long periods of time soils and potting mixes may become dry or hydrophobic. Water repellence results from waxy organic compounds coating soil particles. Soils that repel water negatively impact the growth and health of plant life.

SaturAid's active ingredient works immediately to break down the water surface tension allowing maximum rehydration of soils and potting mixes.

Increases water penetration

Gets water deep into dry soils. Watering becomes more effective and the frequency is reduced.

Improves water retention

Allows soil particles to absorb water at the root zone resulting in stronger, deeper root systems.

Long lasting

SaturAid starts working immediately and lasts for up to 10 months.

Non-toxic

Safe for all plant types and safe to use around ponds and waterways.

How to use

Apply at application rates below. SaturAid can be applied to the surface of your garden beds, pots and lawns or mixed through garden beds when planting.

For maximum effectiveness, apply before periods of rain to increase water absorption in preparation for dryer periods.

Apply more frequently during dryer periods. As SaturAid is non-toxic, usage rates can be exceeded without harming plant life.

Re-apply every 10 months or more regularly if required.

GARDEN BEDS AND LAWNS

Blend into new garden beds or simply sprinkle on to existing garden beds or lawns.

30 litres will cover up to 600m²

First time application: 100 ml per m²
Maintaining garden: 50 ml per m²

CONTAINERS, POTS & BASKETS

Apply on surface or mix through potting mix when planting.

SIZE – width	Quantity
250 mm (10 inch pot)	20 ml
300 mm (12 inch pot)	40 ml
400 mm (16 inch pot)	65 ml
Application pro rata for other sizes.
