USEFUL TIPS

- Sometimes you might see white mould on your compost. This is not harmful to your plants and will disappear naturally.
- Some plants are hungrier than others so may need feeding earlier. If the leaves start to pale this is a sign to start feeding with a **Miracle-Gro® Plant Food.**
- Try to avoid compost in pots drying out, and don't let them sit in water – roots don't like being waterlogged!
- Outdoor pots and containers might need more water in the summer. Always check before you water by dipping a finger about 3 cm into the soil. It can be wet below the surface – if damp, don't water.
- **Miracle-Gro® Peat Free Premium All Purpose Compost with Organic Plant Food** is ideal for many plants, including bulbs and houseplants, however there are a few plants that are better suited to other composts:
- When growing from scratch, we recommend **Miracle-Gro® Seeds, Plugs and Young Plants Compost** which is specially formulated for younger plants.
- For all plants that love acidic soil, known as ericaceous, we strongly recommend **Miracle-Gro® Azalea, Camellia and Rhododendron Compost.**
