

For best results feed with TOMORITE

For best results feed with TOMORITE

- PLANTING** Shake the bag to distribute the contents. When only planting two plants use the end panels. Delay planting tomatoes until the first flower opens.
- WATERING** After planting, water in using about 4.5 litres (approx. 1 gallon), and then water as necessary to keep the bag moist.
- FEEDING** We recommend feeding 20ml of Tomorite in 4.5 litres (1 gallon) of diluted Tomorite for most crops, once a week for heavy feeders such as tomatoes under glass.
- SUPPORTING** Avoid piercing the bottom of the bag. Train plants to fan out so that they receive maximum light and air.

CROP	PLANTS PER BAG	START FEEDING WHEN
Tomatoes – under glass	3	The fruit on first truss is pea sized
Tomatoes – outdoor	3	The fruit on second truss is pea sized
Peppers & Aubergines	3	The fruit is the size of a golf ball

Tomatoes – under glass	3	The fruit on first truss is pea sized
Tomatoes – outdoor	3	The fruit on second truss is pea sized
Peppers & Aubergines	3	The fruit is the size of a golf ball
Melons	2	The first fruit is swelling
Courgettes/Marrows/Cucumbers	2	The first picking commences

STORAGE:
Store in a cool dry place, away from sun, in a frost free position. Keep the bag closed when in storage to prevent drying out. Keep away from pesticides. Storage from one year to another may affect performance.

HEALTH AND SAFETY ADVICE:
USE IN A WELL VENTILATED PLACE AND AVOID BREATHING IN DUST. ALWAYS WEAR GLOVES WHEN GARDENING AND THEN WASH HANDS AFTER USE. OPEN BAG CAREFULLY AND RESEAL AFTER USE. Occasionally, a white mould may appear on the compost. This is not harmful to your plants and should disappear naturally.
