WHERE TO USE?

Use for all types of ericaceous plants

Our Ericaceous compost is ideal for final potting of acid loving plants like Azaleas, Rhododendrons or Heathers. It has been specially developed, with a unique combination of 14 vital minerals for maintaining plants growth and health. With its unique mix of peat, fibresmart woodfibre and composted bark it provides the perfect structure for your plants roots.

Potting-on plants

Re-potting is best done in the spring, when plants are actively growing. Before re-potting, water plants well and allow to drain. Put fresh compost in the bottom of a new pot. Turn the old plant upside down and tap the pot sharply to release. Place the plant in the middle of the new pot and add more compost, firming lightly around the root-ball.

Beds and Borders

Dig a hole twice the size of the root ball. Part fill the hole with equal quantities of soil and compost. Ensure the plant is at the same level as in the pot.

HOW TO USE?

Instructions for use

Use straight from the bag, it's as easy as that. When filling or potting, firm lightly. Keep the compost moist and do not let it dry out. Do not leave plants standing in water.

Storage instructions

- Keep the bag closed when in storage to prevent drying out.
- Storage from one year to another may affect performance.
- Keep away from pesticides.
- Occasionally a white mould appears on the compost. This is not harmful to your plants and should disappear naturally.

Health and safety advice

- Use in a well ventilated place and avoid breathing in dust.
 Always wear gloves when gardening

 - Wash hands after use.
 - Store in a cool place, away from sun.
 - Open bag carefully and reseal after use.

Evergreen

OUR STORY...

Established in 1967, Levington has been providing expertise, research and innovation into compost for over 50 years. When it comes to compost, Levington has been the gardener's choice for decades.

At our officially recognised research station in Levington, Suffolk, we are constantly innovating and testing for the best combinations of ingredients in compost to ensure your plants are strong and healthy.

WHAT IS IT?

What is Ericaceous compost?

Special pH for acid loving plants with extra iron for glossy green leaves.

Optimum **drainage** system prevents excess moisture.

NITROGEN (N)	For greener leaves and healthy shoots
PHOSPHATE (P)	For strong root development
POTASSIUM (K)	For fruit and flowers
TRACE ELEMENTS	Essential for all round plant health and disease resistance
EXTRA IRON	For gloss green leaves

Patented **wetting agent** which enables compost to soak and absorb higher levels of water without getting water logged.

SUSTAINABILITY

Responsible sourcing

We are actively working on improving the responsible sourcing profile of our compost mixes year on year. Levington compost contains forest by-products, carefully processed to help you grow plants that improve your environment and make the world a more beautiful place.

How much Peat?
