

Environmental Information

At Scotts we are justly proud of our environmental record and our concern for the environment, both at our production facilities and in your garden. With this in mind we continue to develop outstanding, consistent growing media using a range of peat based, reduced peat and peat free ingredients, many of which make use of otherwise waste material.

Over the last decade we have significantly reduced the proportion of peat we use in our composts and will continue to do so. We do not harvest any peat from SSSI or SAC sites and are actively involved in helping the management and restoration of the peat land areas that we harvest from.

As we continue to work towards reduced peat formulations we are continually introducing new materials into our products. This may mean that you notice a difference in the appearance of your compost from year to year. Rest assured, any changes to our formulas are rigorously tested so we can guarantee the product you are using is as good as, if not better, than before.

Enriched
with recycled
materials
for optimum
growth

We recommend you always wear gloves when gardening.

Where to Use:

Levington® Rose, Tree & Shrub Compost is ideal for:

- Shrubs, trees, roses, hedging, fruit bushes, including ericaceous plants (acid loving, lime hating).
- Planting bare root outdoor roses, trees and shrubs, moving or planting established and container plants.

Planting Out

1. Water the plant thoroughly.
2. Dig a hole twice the size of the root ball.
3. Part fill the hole with a mix of 50% soil and 50% Levington® Rose, Tree & Shrub Compost.
4. Ensure the plant is at the same level as in the pot.
5. To provide stability for taller plants a stake may be hammered into the ground and the plant loosely tied to it.
6. Fill in firmly, then water.

rose, tree & shrub compost

THE PROFESSIONAL

GROWERS' CHOICE

Levington® Rose, Tree & Shrub Compost

contains a unique blend of nutrients

NITROGEN (N)	For greener leaves and healthy shoots
PHOSPHATE (P)	For strong root development
POTASSIUM (K)	For fruit and flowers
TRACE ELEMENTS	Essential for all round plant health and disease resistance
WATER RETAINING AGENT	Levington® has a water retaining agent that enables the compost to soak up and retain higher levels of water without getting water logged.
PATENTED WETTING AGENT – HOLDS IN EXTRA MOISTURE	Levington Rose, Tree & Shrub Compost has a special combination of nutrients and water retaining properties to enable the fast establishment of roses, trees and shrubs.

Caring for Your Plants

WATERING: For the best results ensure that the soil around the plant does not dry out in the first season. To help conserve water around precious plants, apply a mulch such as Levington Water Saving Bark. This will also help suppress weeds.

FEEDING: Levington® Rose, Tree & Shrub compost contains all of the essential nutrients for the first season - no feeding is required. We recommend that plants are fed with Miracle-Gro® Rose Food, so that they continue to grow with abundance in following seasons.

Premium Guarantee

If you are not completely satisfied with the performance of this product we offer you your money back.
