

Compost Maker

Use to make a rich, dark compost by recycling garden and kitchen plant waste materials such as:

- Grass cuttings, vegetable matter, egg shells, weeds, leaves, shredded stems and other woody materials

Home made compost makes a superb soil conditioner, planting compost and mulch

Apply direct from the pack

How to use

On compost heaps

sprinkle evenly over 20-25cm of composting material and lightly fork in.

In compost bins

mix evenly with 20-25cm of composting materials as the bin is filled.

Making compost

Site your compost bin or heap in a warm, sheltered part of the garden. For best results, it should be in contact with the soil and have a cover. Add a good mixture of garden and kitchen waste, shredding or breaking up larger pieces. Do not add large quantities of grass, paper, card or woody branches all in one go. Keep the compost moist but not waterlogged. Water the heap if the waste is dry or woody. Forking over, mixing or turning the contents every few weeks or so will help the composting process. The top of the heap should be kept warm and moist by covering with a lid, polythene sheet or similar covering. Do not add cooked food of any kind as this can attract vermin.

When to use

Miracle-Gro® Compost Maker can be used at any time you are making your own home-made compost. It will speed up the composting process, and is especially useful from autumn to spring when temperatures are lower. It is a great way to get a new compost heap started.

Use	Application Rate
Every 20-25 cm thick layer of app. 1 square meter of composting material	150-200g

Coverage: 3.5-5.8 cubic metres of composting material

3.5kg e

We recommend you always wear gloves when gardening.

General advice

- Only to be used as a garden compost accelerator.
- Do not exceed the appropriate application rate.

This carton is made from 100% recycled paper fibre.

The UK's best selling branded compost!

Miracle-Gro® All Purpose Enriched Compost
