- ✓ Active ingredient occurs in nature
- ✓ Kills slugs and snails
- ✓ Suitable for grow your own crops
- ✓ Approved for use in organic systems (OF&G)
- ✓ Up to two weeks protection Visible results in days\*
- ✓ Treats 228m<sup>2</sup>

### HOW DO I USE SlugClear:

Use SlugClear™ Ultra 3 pellets during the slug season, spring or autumn, when the first signs of slug or snail damage are visible on plants. Sprinkle the pellets evenly and thinly over the soil around the plants to be protected, so that the individual pellets fall 8-10cm (3-4 inches) apart. Maximum individual dose is 3g product per square metre. Ensure pellets do not become trapped in the leaves or other parts of the plants. Repeat application after 2 weeks if further protection is required. Maximum number of treatments per year: 4. Avoid excessive watering for a few days after application. **No clearing up:** the slugs and snails stop eating plants and crawl away into their hiding places in the ground to die.

### WHEN AND WHERE DO I USE SLUGCLEAR:

During slug season, spring and autumn. For use on bare soil around strawberries, salad crops, brassicas, ornamentals and flowers. Safe to eat crops straight away. Outdoor use: apply pellets in mild damp conditions when slugs and snails are most active. Greenhouse use: Soil should be damp, not wet.

#### \*WHEN WILL I SEE RESULTS:

Efficiently reduces damage within 4 days.  
One application lasts up to 2 weeks.
