

PATH & DRIVE ROUNDUP CONCENTRATE

Kills most garden weeds with a single application.

This product is a home garden weedkiller for use on unwanted vegetation and areas not intended to bear vegetation (e.g. weeds growing through all hard surfaces including drives, patios, paths, tarmac, gravel and paving).

DO NOT USE ON LAWNS AND OTHER WANTED PLANTS

RISK AND SAFETY INFORMATION

To avoid risks to human health and the environment, comply with the instructions for use. Read label before use.

- Keep out of reach of children.
 - Keep product away from food and drink.
 - If medical advice is needed, have product container or label at hand.
 - Keep product in original container.
 - Dispose of contents/container to a household waste recycling centre as hazardous waste except for empty containers which can be disposed of by recycling.
 - Contact your local council for details.
- MAPP 17291 PCS No. 05448

ENVIRONMENTAL PROTECTION

Do not contaminate water with product or its container. Do not empty into drains.

Keep children and pets away from treated areas until spray has dried

PATH AND DRIVE ROUNDUP CONCENTRATE is a soluble concentrate containing 170 g/l (15.04 %w/w) glyphosate acid (present as 208 g/l (18.43 %w/w) potassium salt of glyphosate)

PROTECT FROM FROST

280ml e

12536652

Where to use examples

Clear weeds around walls, fences, trees & shrubs

Clear weeds from drives & patios

Do not use with a watering can

Avoid drains and water points

Restriction

If not applied as a spot treatment, the maximum yearly dose must not exceed the dose indicated in the above crop tables. Do not walk or allow children and pets into treated areas until the product has dried on leaves to avoid transfer to lawns and other desired vegetation.

Replanting and sowing

Light cover of annual weeds :	Replanting/sowing can commence the day after treatment.
Dense cover, including perennial weeds:	Leave at least 7 days for the weedkiller to move to underground roots and shoots before digging or cultivating soil.

After application, rinse the sprayer three times, pouring rinse water over bare ground. Triple rinse the empty bottle and pour rinse water over bare ground.

First Aid

Eye contact: Immediately flush with plenty of water. If easy to do, remove contact lenses.
Skin contact: Take off contaminated clothing, wrist-watch, jewellery. Wash affected skin with plenty of water. Wash clothes and clean shoes before re-use.
Inhalation: Remove to fresh air.
Ingestion: Immediately offer water to drink. Never give anything by mouth to an unconscious person. Do NOT induce vomiting unless directed by medical personnel. If symptoms occur, get medical attention.

How to use

Although not a requirement, as good practice, we recommend wearing waterproof gloves and gardening footwear. Work out the amount of spray solution needed by using the table below. Fill the sprayer with clean water to about 50% of the needed solution. Add the measured amount of concentrate (use the measuring cap). Shake gently and add clean water to the total amount needed. Close the sprayer; put it under pressure; direct the nozzle to the target weeds and spray. Apply by sprayer to lightly wet the leaves. 1 litre is approximately 2 pints. 5 litres is approximately 1 gallon.
Do not apply through, or store in, galvanised or unlined steel sprayers or watering cans. Weeds show effects within 1-4 weeks. Dead or dying weeds can be dug in or composted without harming future plants.

Annual and perennial weeds (Foliar applications)

PATH AND DRIVE ROUNDUP CONCENTRATE to be added to: Sprayer - 1 litre of water	Area treated	When to treat
Annual weeds: Chickweed, Speedwell, Annual Meadow-grass	20 ml	30 m ² When actively growing, usually February - November
Perennial Grasses: Including Couch	30 ml	30 m ² When actively growing, usually February - November
Tough perennial deep rooted and broad-leaved weeds: Bindweed, Dandelions, Docks, Ground Elder, Thistles (see below#)	30 ml	30 m ² Dandelions, Docks: When actively growing, usually April - October Bindweed, Ground Elder, Thistles: around the time of flowering

Some tough weeds (e.g. Horsetail & Ground Elder) may need a repeat treatment if regrowth appears.

PATH & DRIVE ROUNDUP CONCENTRATE

PATH AND DRIVE ROUNDUP CONCENTRATE is a non-selective, translocated weedkiller that is absorbed by leaves and moves throughout the entire plant, above and below ground, to control annual and perennial weeds, including grasses and deep rooted perennial weeds. PATH AND DRIVE ROUNDUP CONCENTRATE is degraded by micro-organisms in the soil. KEEP CHILDREN AND PETS OUT OF TREATED AREAS UNTIL DRY.

Instructions for use

- Apply as a foliar spray to weeds at any time when the weeds are actively growing and have adequate leaf area to absorb the spray.
- Avoid spraying when rain is imminent. Rain within 6 hours of spraying may reduce effectiveness, so repeat treatment may be necessary.
- Avoid spraying in windy conditions, as spray drift to lawns and other wanted plants will damage or destroy them.
- Avoid all other spray contact with cultivated plants. If cultivated plants are treated by mistake, IMMEDIATELY AND THOROUGHLY wash off the weedkiller with ample water.

Where to use

PATH AND DRIVE ROUNDUP CONCENTRATE controls annual weeds and most perennial weeds around the garden and on areas not intended to bear vegetation such as hard surfaces, patios, drives, tarmac, paths and gravel areas. Direct spray away from ponds and other surface water bodies.

DO NOT USE ON WANTED PLANTS. DO NOT USE ON AREAS OF LAWN UNLESS YOU WANT TO KILL IT. DO NOT USE UNDER POLYTHENE OR GLASS.
