

BUG CLEAR™

FRUIT & VEG
ULTRA

MAPP 2019Z

BugClear Fruit & Veg Ultra contains a plant based active ingredient. Ideal for ornamental plants, fruit and vegetables.

Kills: Larvae and adult aphids (greenfly and blackfly), spider mites and whiteflies.

Effects: are visible within 1 day.

INSTRUCTIONS FOR USE:

FOR USE ONLY AS AN AMATEUR INSECTICIDE & MITE KILLER. Read all safety instructions before use. Fruit and Veg can be picked 24 hours after spraying. Wash thoroughly before use.

WHEN TO USE:

March to the end of September. Spray at first sign of insects and repeat applications at 7-10 day intervals. It is essential to ensure comprehensive coverage of the plant surface, particularly the underside of the leaves. On fruit trees, depending on tree size, complete coverage may not be practical, and the product is unlikely to give complete control of widespread populations.

DO NOT USE during high temperature (above 25°C) or during periods of high light intensity. Blooms and young leaves may react sensitively. **Maximum number of treatments: 3 per crop.**

WHERE TO USE:

Ideal for ornamental plants, fruits and vegetables. Some plants may be sensitive to oils. It is always advisable to test a sample of plants, by treating them and leaving for at least two weeks, before treating a large or valuable collection. Do not treat sensitive species of floral plants (e.g. poinsettias, cyclamens, kalanchoes, African violets, ferns, or ivy etc.). Do not spray on directly onto blooms.

HOW TO USE:

Shake well before use (5 seconds).

Choose a calm day, avoid bright sunlight, drought and frost. Spray early morning (7-9am) or evening (6-8pm) to minimise risk to bees. **1.** Press down firmly on top of trigger head immediately behind yellow nozzle to depress safety tab. At the same time, twist nozzle to spray position (¼ turn either way). **2.** Spray plants thoroughly to wet upper and lower surfaces of leaves. Avoid contact with non-target plants. **3.** Turn nozzle to the 'OFF' position after use.
