

Levington® Decorative Chipped Forest Bark

A 100% natural by-product which is ideal for use in low maintenance gardening and for decorative purposes. **Levington® Decorative Chipped Forest Bark** is also an excellent mulch and weed suppressant. Whilst keeping those unsightly weeds at bay, the large chips help to retain valuable water within the soil beneath.

Why use

Levington® Decorative Chipped Forest Bark is not only a natural by-product but it is also an excellent choice that can help to enhance the appearance of your garden in many areas, (even your amenity areas). The larger size of the chip means that **Levington® Decorative Chipped Forest Bark** is long lasting and excellent at suppressing weeds. Ideal for flower beds, borders and paths and pleasant to handle with a fresh and pure pine aroma.

Valuable water within the soil or compost is often lost. By placing a layer of **Levington® Decorative Chipped Forest Bark**, essential water is retained.

Extreme weather conditions can often cause soil erosion, damaging the precious roots of your plants. A layer of **Levington® Decorative Chipped Forest Bark** can protect your plants and also the top layer of the soil.

When to use

Use around your roses, flowers, shrubs and trees. Paths and driveways can also be covered with **Levington® Decorative Chipped Forest Bark**. Flower beds, borders and large containers are also excellent places to use **Levington® Decorative Chipped Forest Bark**.

Weed suppression

Prepare the site by removing all of the weeds. This can be done either by hand or using a weedkiller. Remember always read the label. Use pesticides safely.

If required apply **Miracle-Gro® Plant Food** (see pack for details) to the soil before laying down **Levington® Decorative Chipped Forest Bark**.

Levington® Decorative Chipped Forest Bark will need to be laid and spread evenly over the soil or compost to a thickness of 25mm to 50mm (1" to 2"), this can be achieved by either using a rake or by hand.

For the most effective weed suppression, the minimum depth needs to be 50mm (2"). Ground cover fabric can also be laid down over the soil prior to laying the bark.

Note that this pack will cover the following areas according to the depth used:-

25mm - covers 3m²

50mm - covers 1.5m²

Mulching

Use as mulch around your shrubs, in flower beds also containers to keep in valuable water and suppress those unwanted weeds. Using a fork or even your hands spread an even layer about 25mm to 50mm (1" to 2") of the **Levington® Decorative Chipped Forest Bark** over the compost or soil.
