

Fast Action ROUNDUP® Ready-To-Use Weedkiller

Multi-purpose weedkiller, kills annual and deep rooted perennial weeds, including grasses, dandelions, docks, nettles, ground elder, bindweed and thistles. It is inactivated on contact with the soil and is then broken down by soil micro-organisms, to allow replanting.

KEEP CHILDREN AND PETS OUT OF TREATED AREAS UNTIL DRY.

Although not a requirement, as good practice, we recommend wearing waterproof gloves and gardening footwear.

1. Cut the white ties to release the hose and wand and connect the hose to the pack as shown. This is a quick couple system which is not reversible i.e. once in place cannot be removed without force. **• 2. EXTEND WAND** - Lift sprayer off bottle, push yellow button while pulling lance into spray position. **• 3. PUMP** - Pump handle 25-30 times for up to 10 minutes of spray. After pumping, push handle down, turn clockwise to lock into carry position. **• 4. SPRAY** - Adjust spray pattern by turning the nozzle. Aim 50 cm from target weed and press white trigger. Spray to lightly wet the leaves avoiding run-off. **• 5. RETRACT WAND** - After use, push the yellow button and retract the wand to its original position before clipping it onto the side of the pack for storage. This will prevent the accidental release of spray solution when in the storage position. **• 6. STORE** - Push pump handle down, turn pump handle and cap anti-clockwise to relieve pressure, then retighten before storage. **• 7. REFILL** - To refill remove the pump mechanism by unscrewing in an anti-clockwise direction.

When to use

- Spray at any time when the weeds are actively growing and have adequate leaf area to absorb the spray.
- Rain within 6 hours of spraying reduces effectiveness and repeat treatment may be necessary.
- Apply in calm conditions to avoid drift onto cultivated plants.

Where to use

- Controls most weeds around the garden, e.g. gravel areas, paths, drives, hard surfaces, patios, tarmac, along fences and for edging lawns.
- It can be used to clean up weedy ground before planting vegetables, flowers, bushes and trees, and to renovate overgrown areas.
- Do not use on lawns or other wanted plants unless you want to kill them.
- Treat established perennial weeds at the start of flowering to give best results.
- Spray nettles and ground elder when new leaves have unfolded fully in late spring.
- Weeds may show first effects from a few days up to 4 weeks, depending on the weather and the type of weed.
- Leave weeds 7 days before digging or soil cultivation, for the weedkiller to move to the roots.
- Repeat application if necessary, should new growth appear.

Restrictions

- Avoid contact by spray and spray drift with cultivated plants and desired vegetation
- To avoid transfer to lawns and other desired vegetation do not walk into treated areas until the product has dried

This product is a home garden weedkiller for use on unwanted vegetation and areas not intended to bear vegetation. It contains 7.2g/l glyphosate acid (present as 9.7g/l IPA salt of glyphosate in a ready to use solution)
