

Pot Shots

6 month Plant Food Cones

Why use Pot Shots?

- Ideal for all plants whether in hanging baskets, pots or containers.
- 6 month feed cones - one feed lasts the entire season.

How to use

- Push the cones, at 5-10 cm from the plant and 5 cm into the compost.
- Use anytime from February onwards.

Small plants and sensitive plants:

impatiens, begonia, gerbera, pansies
1 cone per plant

Medium size plants

1-2 cones per plant

Large size plants

2-3 cones per plant

Storage

Reseal pack after opening.
Store in a dry place.

Pot Shots, the shot for your pot!

Miracle-Gro® Pot Shots are a unique range of plant food cones specially formulated for Pots and Containers.

The cones are ergonomically designed to easily push in to the soil and feed your plants for up to 6 months. They are pre-measured so no hassle and no fuss to feed your plants! The feed is directly available at the right place, closer to the roots.

With Miracle-Gro® Pot Shots there is no overfeeding, no waste and no dispersion in wind or rain.

Useful tips

- Water regularly according to the plant's needs.
- Wash hands after use.
- Reseal pack after use and store in a dry place to preserve the best product quality.
- After 6 months you may find that the granules are still present. Don't worry - they have worked! The plant food has been released slowly from the granules, leaving behind the coating.

UK/ROI Fertiliser Declaration

EC FERTILISER

NPK (Mg) Fertiliser blend 14-9(3.9)-11(9.1) (2(1.2)) with micronutrients

Nitrogen (N)	total 14.0%
Nitric nitrogen (N)	6.0%
Ammoniacal nitrogen (N)	8.0%
Phosphorus pentoxide (P ₂ O ₅) soluble in neutral ammonium citrate and in water	9.0% (3.9% P)
Phosphorus pentoxide (P ₂ O ₅) soluble in water	6.7% (2.9% P)
Potassium oxide (K ₂ O), soluble in water	11.0% (9.1% K)
Magnesium oxide (MgO)	2.0% (1.2% Mg)
Boron (B) of which 0.01% water soluble	0.015%
Total Copper (Cu) of which 0.022% water soluble	0.04%
Total Iron (Fe), of which 0.06% chelated by EDTA and water soluble	0.35%
Total Manganese (Mn)	0.05%
Total Molybdenum (Mo) of which 0.01% water soluble	0.015%
Total Zinc (Zn)	0.012%
pH range for stability of the chelated micronutrients 4-6.5	

Harmful to aquatic life with long lasting effects.

Dispose of contents & container in accordance with all local/national regulations.

We recommend you
always wear gloves
when gardening.

* Grows plants twice as big versus unfed
