

Special Blend of Organic Nutrients

Levington® Essentials Blended Manure is a blended manure as used by many traditional gardeners. Through a wealth of knowledge gained over 50 years of research, we have developed a unique combination of ingredients for Levington®.

Made with Concentrated Manure - Enriches Poor Soil

Levington® Essentials Blended Manure is a rich blend of concentrated manure with composted organic matter. It is ideal for making raised beds where existing soil is poor or for replacing soil that is tired or unsuitable for the re-planting of related plants. It can be used as a component of soil/loam based type composts.

It is ideal for:

- Beds and borders
- Before sowing and planting
- Soil improvement
- Vegetable plots and allotments

Our commitment to the environment

Did you know that you're part of one of the World's largest recycling efforts?

Each year, Scotts Miracle-Gro reuses thousands of tonnes of material from gardens and forests in many of our compost mixes, to help you grow plants that enhance your environment and make the World more beautiful.

Storage

Store in a cool place, away from sun. Open bags carefully and reseal after use.

Health and Safety Advice:

- Use in a well ventilated place and avoid breathing in dust.
- Always wear gloves when gardening and then wash hands after use.

litre**

when filled

Volume may reduce by up to 10%*

Where to Use:

Beds and Borders

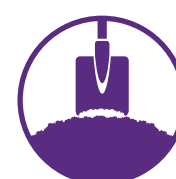

Spread a 5-8 cm (2-3 inches) layer of Levington® Essentials Blended Manure beneath the branches of roses, shrubs, fruit trees and bushes. Allow a 5-8cm (2-3 inches) gap around stems. This 100% organic mulch will help the soil retain moisture, suppress weeds and release food to surrounding plants.

Before Sowing and Planting

Fork in Levington® Essentials Blended Manure liberally to the soil surface and to the bottom of planting holes, drills and trenches for an abundant crop of flowers, fruit and vegetables. Improve the soil used to fill planting holes and trenches with one part Levington® Essentials Blended Manure to two parts existing soil.

Soil Improvement

Spread a 5-8cm (2-3 inch) layer of Levington® Essentials Blended Manure over the soil surface and dig in. This will improve drainage and structure of clay soils and the fertility and moisture holding capacity of sandy and chalky soils.

Vegetable Plots and Allotments

In spring spread a 5-8 cm (2-3 inches) layer of Levington® Essentials Blended Manure over soil and dig in before sowing or planting. On heavy clay soils repeat when winter digging.
