For beautiful flowers, fruits and vegetables reduce unwanted slug and snails with **ORIGINS® SLUG CONTROL**.

One application will keep slugs at bay for up to 2 weeks leaving your produce for you to enjoy and not them!

Read all safety instructions before use

INSTRUCTIONS FOR USE

WHEN TO USE

Slugs love the wet cooler weather so **spring** and **autumn** is prime season.

Use when you first see any slug or snail damage on your plants

SPRING

AUTUMN

FIRST SIGN OF DAMAGE

WHERE TO USE

FOR USE ONLY AS A HOME GARDEN SLUG AND SNAIL CONTROL.

For outdoors, use when conditions are mild and damp. This is when slugs and snails are most active. In greenhouses the soil should be damp, not wet.

Origins® Slug Control can be used on bare soil around strawberries, salad crops and flowers. Ensure pellets are evenly applied over the whole soil area of plants that you want to protect. Don't let pellets rest on, or become trapped in the leaves or other parts of the plants.

**FOR FRUIT & VEG OR
FLOWERS & PLANTS**

HOW TO USE

Sprinkle the pellets evenly and thinly over the soil and around the base of the plants to be protected so that the individual pellets fall 8-10cm (3-4 inches) apart (approximately 140 pellets or 3g/m²). Do not put on the ground in heaps and avoid watering too much for a few days after application.

Maximum individual dose: 3g product per m².

Repeat application after 2 weeks if further protection is required.

450g is sufficient to treat 15m²

Maximum number of treatments per year: 4.

Safety interval between use and consumption: none.

**SPREAD PELLETS EVENLY
APPROX 8-10CM APART**

CHILDREN & PETS

Use as directed to protect children and pets.

Organic Farmers & Growers is one of the UK's leading organic certifiers, working with producers and

processors to ensure their products meet the highest organic standards.
