

BugClear™ Ultra 2 Gun! is an insecticide for ornamental plants.

Effective against a range of common insects including aphids, mites, whiteflies, scale insects, mealy bugs, caterpillars, lily beetles, leaf beetles and leafhoppers.

BugClear™ Ultra 2 Gun! contains rapeseed oil, extracted from oil seed rape, and pyrethrum, a chrysanthemum flower extract.

INSTRUCTIONS FOR USE

FOR USE ONLY AS A HOME GARDEN INSECTICIDE TREATMENT READ ALL SAFETY INSTRUCTIONS BEFORE USE

Application rate: 100 mL per m²

Maximum number of treatments = 2 per year

For effective control, two applications are required with a 7 day interval.

WHEN TO USE

Spray at first sign of insects or symptoms and repeat as necessary until clear. The best time to spray is early morning or early evening, avoiding bright sunshine. Do not use **BugClear™ Ultra 2 Gun!** during periods of high temperature (above 25°C) or when temperatures might become high or during periods of high light intensity. Avoid spraying on blooms and young leaves as these may react sensitively.

WHERE TO USE

BugClear™ Ultra 2 Gun! is ideal for ornamental plants. Some plants may be sensitive to oils. It is always advisable to test a sample of plants, by treating them and leaving for at least two weeks, before treating a large or valuable collection. Do not treat sensitive species of floral plants with delicate foliage (e.g. cyclamens, ferns etc). Some varieties of dahlia and nasturtium may be particularly sensitive to **BugClear™ Ultra 2 Gun!** Do not spray directly onto blooms.

HOW TO USE

Apply as a fine spray to thoroughly wet the leaves and stems of infested plants, but avoid direct application to open flowers. Ensure the lower surface of leaves is thoroughly wetted. Pesticide resistance in aphids and glasshouse whitefly is widespread. Where resistant pests are present **BugClear™ Ultra 2 Gun!** is unlikely to give control. Any run-off onto undesirable surfaces should be washed away, as staining may occur if the solution is allowed to dry.

SHAKE WELL BEFORE USE.

1. Press down firmly on top of trigger head immediately behind yellow nozzle to depress safety tab. At the same time, twist nozzle to 'SPRAY' position (1/4 turn either way).
2. Apply spray evenly ensuring contact with the pests but avoiding run-off.
3. Turn the nozzle to stop position after use.
