Nitrogen from urea formaldehyde (N)	8.3%
Nitrogen from urea formaldehyde only soluble in hot water	2.8%
Nitrogen from urea formaldehyde soluble in cold water	2.8%
Phosphorus pentoxide (P ₂ O ₅) total	5.0% (2.2%P)
Phosphorus pentoxide (P ₂ O ₅) soluble in neutral ammonium citrate and in water	4.6% (2.0%P)
Phosphorus pentoxide (P ₂ O ₅) soluble in water	4.3% (1.9%P)
Potassium oxide (K ₂ O) soluble in water	5.0% (4.2%K)

EverGreen® Premium Plus Weed Control Lawn Food contains 0.8% w/w 2,4-D and 0.12% w/w dicamba as a granular formulation (GR)

INSTRUCTIONS FOR USE

FOR USE ONLY AS A HOME GARDEN LAWN TREATMENT

Maximum individual dose:
20g product per square metre.

**Maximum number of treatments:
1 per year.**

When to apply

Apply anytime between March and September when weeds are actively growing. Apply when the weather is fair, the soil moist and the grass is dry. Avoid mowing the lawn for 4 days before and after application.

For best year round results, use this product as part of an annual programme. Do not apply in hot dry weather, bright sunshine or with frost.

Where to apply

For use on lawns. This product can be used around trees planted in the turf, but avoid contact with foliage. It can be applied where bulbs are growing in the turf, providing the foliage has already died down naturally.

Be careful when applying near shrubs, flower beds or vegetable plants as contact may damage them.

The first four mowings after treatment should not be used as a mulch unless composted for at least 6 months.

* No scorch when applied correctly - see how to apply guidelines.

For more information and key gardening tips visit our website at:
miracle-gro.co.uk or call +44 (0)1276 401 300

What to expect

The lawn will be greener in 1 week and stays green for months.

Dandelions, daisies and other lawn weeds will usually die in 3 to 5 weeks.

At first some weeds will grow vigorously, and then become distorted and twisted before they die.

EverGreen® Premium Plus Weed Control Lawn Food will not scorch your lawn when applied at the recommended dose rates (when using a spreader) and in ideal conditions. Over use can damage the lawn.

HOW TO APPLY

MAX 20g 1m² BY HAND

Apply by hand, wearing gloves at a maximum individual dose of 20g per square metre.

For a visual guide to the correct application rate, first spread the recommended amount over a small measured area.

Areas for treatment must be marked out to ensure even application.

BY SPREADER

Evergreen Garden Care have an unrivalled range of spreaders for small and large lawns. Always read the spreader instructions before use.

Spreader Settings

EverGreen® Wizz™ Year-Round Spreader	4.25
EverGreen® Handy Spreader	3.5
EverGreen® Easy Spreader+	4
EverGreen® Drop Spreader	4.5
EasyGreen® Rotary Spreader	26.5

Visit www.lovethegarden.com for guidance on spreader settings.

Watering or rain

If no rain falls within 2 days, water the lawn thoroughly. Do not apply if rain is expected within the next 24 hours.

Seeding and turfing

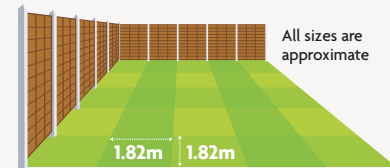

Wait at least 6 months after seeding or turfing new lawn areas before using EverGreen® Premium Plus Weed Control Lawn Food. Do not re-seed or turf for at least 6 weeks after application.

HOW MUCH WILL I NEED?

This pack treats 100m² (10m x 10m).

To determine the size of your lawn multiply the length by the width in metres.

Alternatively a lawn with 6 by 5 standard fence panels (1.82m width), will cover approx 100m².

All sizes are approximate

Keep children and pets away from treated areas until granules have been watered in and dried
