INSTRUCTIONS FOR USE

When and where do I use it?

Apply when the weather is fair, the soil moist, the grass dry and frost free.

To prevent potential staining, please see 'lawn care advice' section.

How do I use it?

MAX 35g 1m²

BY HAND

Apply at a maximum individual dose of 35g per square metre.

For a visual guide to the correct application rate, first spread the recommended amount over a small measured area.

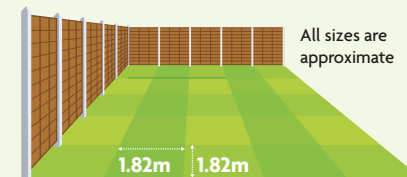

Areas for treatment must be marked out to ensure even application.

How much will I need?

This pack treats 80m² (10m x 8m).

To determine the size of your lawn multiply the length by the width in metres.

Alternatively a lawn with 5 by 5 standard fence panels (1.82m width), will cover approx 80m².

All sizes are approximate

When will I see results?

Results are quick if lawn is watered in after application.

After 3 days your lawn will become a richer, greener colour.

Reapply after 6 weeks.

BY REFILLING

LAWN CARE ADVICE

MOWING: You should avoid mowing the lawn for 2-3 days before and after treatment, or until after rainfall or irrigation.

WATERING-IN: For performance purposes, it's advisable to water in after application, especially if the weather is hot and dry and the lawn is under stress.

STAINING: Iron Sulphate can cause brown stains on clothes, paving slabs, etc. Water product in before walking on the lawn to avoid staining. Brush off immediately if spilt.

Miracle-Gro® Fast Green Lawn Food is not recommended for lawns less than 6 months old.
