HOW
TO USE

CONTAINERS & POTS: OUTDOORS

Partly fill container with compost.

Firmly place bulbs in compost ensuring the bulbs do not touch each other or the container.

Fill the container with more compost, to twice the depth of the bulb.

Water thoroughly and place outside for flowering in spring.

CONTAINERS & POTS: INDOORS

Place containers in a frost-free, cool, dark, airy place, water as necessary.

When shoots are green move to a warmer environment. Leaves should appear 6-8 weeks before bulbs flower fully.

After flowering, place in a light place and water regularly until leaves die. Store bulbs in a cool, dry place until spring and plant in flower beds.

BEDS & BORDERS

Dig a hole 10-15cm (4-6 inches) deep.

Cover the bottom with a layer of compost.

Place bulbs firmly onto compost and fill.

Firm gently and water thoroughly.
